

LIBRARY - Circulation Procedure

Books and other publications can be checked out from the circulation counter. Books are issued for 2 months, bound volumes of journals for 3 days and current issues of journals and reference books overnight. Journals will not be issued out (on loan) to non-academic staff. In exceptional situations additional borrowing facilities may be allowed if such requests are approved by the competent authority. Books can be called back during the loan period, if there is demand from another user. Consecutive renewals of any particular copy of a bound journal by the same borrower over a long period of time may not be allowed. However, a book may be re-issued to a borrower if there is no demand for it from other members. The documents issued should be returned on or before the due date. Fines are incurred @ Rs.2/- per week for books after a grace period of one week, Re.1/- per day for bound volumes of journals, current journals and reference books. The library generally issues overdue notices, but failure to receive such a notice is not sufficient reason for non-return of overdue books or journals etc.

The fine structure for the late return books and documents are as follows:

- 1. **Reference Books and Loose issues of Journals:** These documents will be issued overnight/day time only. If the book is returned on the next day by 11.30 AM, there is no fine. After that each day or part thereof will be charged @ Rs.1.00.
- 2. **General Books:** This document will be issued for 2 months plus one-week grace period. Thereafter for delay of each additional week or part thereof fine will be charged @ Rs.2.00
- 3. **Bound Volumes of Journals:** Bound volumes issued for 3 days and after that fine will be charged @ Rs.1.00 per day.
- 4. **Non-Book material (CD-ROM, Floppy, Microfiche and On-line):** These electronic documents are issued on request basis to faculty members. The same can be accessed only in the **Library Electronic Cabin.**

The library connects us with the insight and knowledge, painfully extracted from Nature, of the greatest minds that ever were, with the best teachers, drawn from the entire planet and from all our history, to instruct us without tiring, and to inspire us to make our own contribution to the collective knowledge of the human species. I think the health of our civilization, the depth of our awareness about the underpinnings of our culture and our concern for the future can all be tested by how well we support our libraries.

AGRICULTURE

1 Future of Indian agriculture: Technology and institutions / edited by Nilabja Ghosh and C.S.C. Sekhar.-- New Delhi: Academic Foundation, 2013. 263 p.

ISBN: 9788171889761.

338.10954 G55F Q3 46738

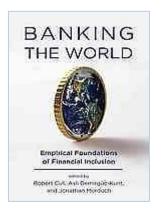

Book Description: The last decade and half has been marked by deceleration in India's agricultural growth, agrarian crisis and food and livelihood security issues. This book provides an insightful analysis of the various dimensions of these problems. The authors and panelists, of national and international repute, have provided a rich analysis of all the major aspects-technology, markets, natural resources, institutions climate change, and framework. The book should be immensely useful to researchers, scholars, policymakers and all those interested in Indian agriculture.

BANKS AND BANKING

2 Banking the world: Empirical foundations of financial inclusion / edited by Robert Cull, Asli Demirguc-Kunt, Jonathan Morduch.--Cambridge: MIT Press, 2013. vi,511 p ISBN: 978-0-262-01842-5.
332.1091724 C89B O3 46806

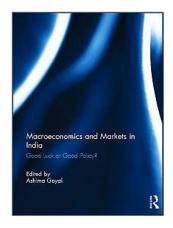

Book Description: About 2.5 billion adults, just over half the world's adult population, lack bank accounts. If we are to realize the goal of extending banking and other financial services to this vast "unbanked" population, we need to consider not only such product innovations as microfinance and mobile banking but also issues of data accuracy, impact assessment, risk mitigation, technology adaptation, financial literacy, and local context. In Banking the World, experts take up these topics, reporting on new research that will guide both policy makers and scholars in a broader push to extend financial markets. The contributors consider such topics as the complexity of surveying people about their use of financial services; evidence of the impact of financial services on income; the occasional negative effects of financial services on poor households, including disincentives to work and over indebtedness; and tools for improving access such as nontraditional credit scores. financial incentives for banking. and identification technologies that can dramatically reduce loan default rates.

CAPITAL MARKETS

3 Macroeconomic and markets in India: Good luck or good policy / edited by Ashima Goyal.-- London: Routledge, 2012. ix,173 p. ISBN: 978-0-415-69017-1. 332.041 G74M Q2 46799

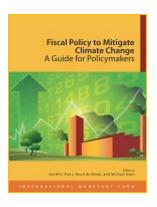

Book Description: India was one of the better performers after the global financial crisis, and has done well despite opening out in a period of great international volatility. This book asks if this was due to luck or to good management. macroeconomic How much did contribute and did it do as much as it could have, on a reform path that was not standard? Are there any lessons from the Indian experience for the rest of the world? Senior Indian policy economists, market participants, and researchers address these interesting and important questions.

There are those who think financial reform has gone too fast - relaxations in foreign borrowing norms exposed firms to external shocks. Volatile capital flows impacted markets, although more liberalization of risk-sharing equity compared to debt flows, was effective in reducing domestic risk. But there are also those who think reform was too slow - choking financial development: many markets and instruments that could improve domestic financial intermediation and reduce risk were held back. Analysis suggests policy was able to find the correct timing, pace and combination of reforms and of caution, but improvement is always possible. Luck and inherent strengths of the economy helped absorb both policy mistakes and external shocks.

CLIMATIC CHANGES

4 Fiscal policy to mitigate climate change: A guide for policymakers / edited by Ian W.H. Parry, Ruud de Mooij, Michael Keen.--Washington: IMF, 2012. xx,198 p.

Book Description: Efforts to control atmospheric accumulations of greenhouse gases that threaten to heat up the planet are in their infancy. Although the IMF is not an environmental organization, environmental issues matter for the organization's mission when they have major implications for macroeconomic performance and fiscal policy. Climate change clearly passes both these tests. This volume provides practical guidelines for the design of fiscal policies (carbon taxes and emissions trading systems with allowance auctions) to reduce greenhouse gases. Not only are these instruments potentially the most effective at exploiting emission reduction opportunities in the near and longer term, but they can also generate for many countries a valuable new source of government revenue. The chapters, written by leading experts, explain the case for fiscal policies over other approaches; how these policies can implemented; reasonable levels for emissions prices; policies for the forest sector; appropriate policy for developing countries; the most promising fiscal instruments for climate finance; and lessons to be drawn from prior policy experience. This is essential reading for policymakers in finance and environment ministries in developed and developing countries alike, and others grappling with balancing environmental and development concerns.

CORRUPTION

5. Williams-Elegbe, Sope

Fighting corruption in public procurement: A comparative analysis of disqualification or debarment measures / by Sope Williams-Elegbe.-- Oxford: Hart Publishing Ltd, 2012 xlix,306 p.

(Studies in international law). ISBN: 978-1-84946-020-0. 364.1323 W67F Q2 46788

Book Description: This book examines the issues and challenges raised by the debarment or disqualification of corrupt suppliers from public contracts. **Implementing** mechanism disqualification in public procurement raises serious practical and conceptual difficulties, which are not always considered by legislative provisions disqualification. Some of the problems that may arise from the use of disqualifications include determining whether a conviction for corruption ought to be a pre-requisite to disqualification, bearing in mind corruption thrives in secret, resulting in a dearth of convictions. Another issue is determining how to balance the tension granting adequate between procedural safeguards to a supplier in disqualification proceedings and not delaying the procurement process. A further issue is determining the scope of the disqualification, in the sense of determining whether it applies to firms, natural persons, subcontractors, subsidiaries, or other persons related to the corrupt firm and whether disqualification will lead to the termination of existing contracts. The book compares and contrasts the legal, practical, and institutional approaches to the implementation of the disqualification mechanism in the US, the UK,

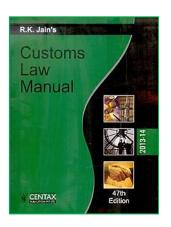

the EU, the Republic of South Africa, and the World Bank. (Series: Studies in International Law - Vol. 42)

ECONOMETRICS

8 Martin, Vance Econometric modelling with time series: Specification, estimation and testing / by Vance Martin, Stan Hurn, David Harris.-- Cambridge: CUP, 2013. xxxv,887 p. (Themes in modern econometrics). ISBN: 978-0-521-13981-6.

330.015195 M36E Q3 46802

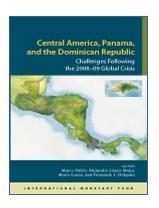

Book Description: This book provides a general framework for specifying, estimating, and testing time series econometric models. Special emphasis is given to estimation by maximum likelihood, but other methods are

discussed, including quasi-maximum likelihood estimation, generalized method of moments estimation, nonparametric estimation, and estimation by simulation. An important advantage of adopting the principle of maximum likelihood as the unifying framework for the book is that many of the estimators and test statistics proposed in econometrics can be derived within a likelihood framework, thereby providing a coherent vehicle for understanding their properties and interrelationships. contrast to many existing econometric which deal mainly with textbooks. theoretical properties of estimators and test statistics through a theorem-proof presentation, this book squarely addresses implementation to provide direct conduits between the theory and applied work.

ECONOMIC CONDITIONS

9 Central America, Panama, and the Dominican Republic: Challenges following the 2008-09 global crisis / edited by Marco Pinon and ...[et al.].-- Washington: IMF, 2012. xi,268 p. ISBN: 978-1-61635-378-0. 330.9728 P65C Q2 I1610

Book Description: Central America, Panama, and the Dominican Republic coped well with the global financial crisis of 2008-09. The impact was generally less severe and shorter lived than in previous episodes, the balance of payments adjustment was orderly, and the

stability of the financial system was not compromised. This resilience can be attributed to a large extent to the strengthening of the fiscal frameworks, monetary management, and financial reforms conducted in the years preceding the global crisis. Nevertheless, the region faces considerable challenges for the period ahead, including the need to raise medium term growth above historical levels and protect macroeconomic and financial stability. This book argues that meeting these challenges will have to come from within, in light of the anticipated modest demand growth from trade partners. Raising growth in the region will depend on the adoption of structural reforms that generate substantial productivity gains. Rebuilding fiscal space and securing debt sustainability will hinge on efforts to increase tax revenue and reorienting spending to social and investment priorities. In the nonofficially dollarized economies, it will also be essential to strengthen the monetary policy frameworks to keep inflation low and increase exchange rate flexibility, and improve financial regulation and supervision.

ECONOMIC DEVELOPMENT

10 Debroy, Bibek
Economic freedom of the states of India 2012
/ by Bibek Debroy and...[et al.].-- New Delhi:
Academic Foundation, 2013. 93 p.
ISBN: 978-81-7188-991-4.
338.954 D34E Q3 46798

Book Description: The Economic Freedom of the States of India 2012 report demonstrates the

significant differences in economic governance that exist in India. It thus has focused attention on state-level reforms to improve growth. The index is based on the Fraser Institute's *Economic Freedom of the World* report. This year's survey also features chapters on the state of Punjab's long decline and India's urgent need for reform in agriculture and the labor market.

11 Fabrizio, Stefania

Managing global growth risks and commodity price shocks: Vulnerabilities and policy challenges for low-income countries / by Stefania Fabrizio.-- Washington: IMF, 2012, xii,73 p.

Strategy, policy and review department. ISBN: 978-1-61635-377-3. 338.91723 F11M Q2 I1616

Book Description: As part of its work to help low-income countries manage volatility, the IMF has developed an analytical framework for assessing vulnerabilities and emerging risks that arise from changes in the external environment. This paper draws on the results of the first vulnerability exercise for low-income countries conducted by the IMF staff using this new framework. It focuses on the risks of a downturn in global growth and of further global commodity price shocks and discusses related policy challenges. Chapters review recent macroeconomic developments, including the spike in global commodity prices in early 2012; vulnerabilities, current risks and including how a sharp downturn in global growth and further commodity price shocks would affect low-income countries; and discuss

policy challenges in the face of these risks and vulnerabilities.

12 India policy forum 2011-12 / edited by Shekhar Shah, Barry Bosworth, Arvind Panagariya.-- New Delhi: Sage Publications, 2012. xx,276 p.

V.8

ISBN: 978-81-321-0973-0. 330.954 Sh2I Q2 46728

Book Description: The objective of this annual publication is to generate theoretically rigorous and empirically informed research on current and unfolding issues of Indian economic policy. This book—the 8th volume in the series—presents a collection of papers presented in the 8th India Policy Forum Conference held on July 12–13, 2011 in New Delhi. Comments and discussions on each paper have also been included.

IPF, Volume 8, 2011–12, in particular, addresses issues related to the scope, speed, and desirability of economic reforms in India and their fundamental impact on the country's social and economic welfare. It deals specifically with issues related to health policies, public expenditure, inflation with respect to food prices, and state ownership of Indian banking sectors.

13 United Nations Development Programme Human development report 2013: The rise of the south: Human progress in a diverse world / United Nations Development Programme.--New Delhi: Academic Foundation,

2013. ix,202 p.

ISBN: 978-93-327-0010-9. 330.9 Un3H Q3 46792

Book Description: The 21st century is witnessing a profound shift in global dynamics, driven by the fast-rising new powers of the developing world. China has overtaken Japan as the world's second biggest economy, lifting hundreds of millions of people out of poverty in the process. India is reshaping its future with new entrepreneurial creativity and social policy innovation. Brazil is raising its living standards by expanding international relationships and antipoverty programmes that are emulated worldwide.

But the "Rise of the South" is a much larger phenomenon. Indonesia, Mexico, South Africa, Thailand, Turkey and other developing countries are becoming leading actors on the world stage. The 2013 Human Development Report identifies more than 40 developing countries that have done better than expected in human development in recent decades, with their progress accelerating markedly over the past 10 years.

ECONOMIC HISTORY

14 Reinert, Erik S.

How rich countries got rich...and why poor countries stay poor / by Erik S. Reinert.-- New Delhi: Anthem Press, 2008. xxix,365 p.

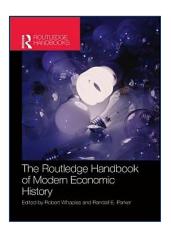

ISBN: 978-1-84331-333-5. 330.9 R27H P8 46790

Book Description: How Rich Countries Got Rich is a narrative history of modern economic development from the Italian Renaissance to the present day. In it Erik S. Reinert shows how rich countries developed through a combination of government intervention, protectionism, and strategic investment. Reinert suggests that this set of policies in various combinations has successful development driven Renaissance Italy to the modern Far East. Yet despite its demonstrable success, orthodox development economists have largely ignored this approach and insisted instead on the importance of free trade. Reinert presents a strongly revisionist history of economics and shows how the discipline has long been torn between the continental Renaissance tradition on one hand and the free market theories of English and later American economics on the other. He argues that our economies were founded on protectionism and state activism and could only later afford the luxury of free trade. When our leaders come to lecture poor countries on the right road to riches they do so in almost perfect ignorance of the real history of mass affluence.

** Economic history; Globalization; Economic development

15 Routledge handbook of modern economic history / edited by Robert Whaples and Randall E. Parker.-- London: Routledge, 2013. xvi,352 p. (Routledge handbooks). ISBN: 978-0-415-67704-2. 330.9 W55R Q3(R) 46794

Book Description: The Routledge Handbook of Modern Economic History aims to introduce readers to important approaches and findings of economic historians who study the modern world. Its short chapters reflect the most up-to-date research and are written by well-known economic historians who are authorities on their subjects.

Modern economic history blends approaches - Cliometrics (which focuses on measuring economic variables and explicitly theories about the historical testing performance and development of the economy) and the New Institutional Economics (which focuses on how social, cultural, legal and organizational norms and rules shape economic outcomes and their evolution). Part 1 of the Handbook introduces these approaches and other important methodological issues for economic history.

The most fundamental shift in the economic history of the world began about two and a half centuries ago when eons of slow economic change and faltering economic growth gave way to sustained, rapid economic expansion. Part 2 examines this theme and the primary forces economic historians have linked to economic growth, stagnation and fluctuations – including technological change, entrepreneurship, competition, the biological environment, war, financial panics and business cycles.

Part 3 examines the evolution of broad sectors that typify a modern economy including agriculture, banking, transportation, health care, housing, and entertainment. It begins by examining an equally important "sector" of the economy which scholars have increasingly analyzed using economic tools – religion. Part 4 focuses on the work force and human

outcomes including inequality, labor markets, unions, education, immigration, slavery, urbanization, and the evolving economic roles of women and African-Americans.

The text will be of great value to those taking economic history courses as well as a reference book useful to professional practitioners, policy makers and the public.

ECONOMIC POLICY

16 Reddy, Y.V.

Economic policies and India's reform agenda: New thinking/ by Y.V. Reddy.-- New Delhi: Orient Blackswan private Limited, 2013. xvi,275 p.

ISBN: 978-81-250-5051-3. 338.954 R24E Q3 46787

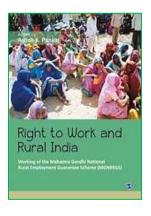

Book Description: Has the still-threatening global financial crisis really signaled the weaknesses of Economics, the scientific discipline as we know it? This question has inspired a volume of essays from Y. V. Reddy. Navigating through the debates between 2010 and 2012 on the continuing global financial crisis, Economic Policies and India s Reform Agenda: New Thinking reflects the confidence of the former central banker who steered the nation s banks to safer waters. Reddy seeks a change in economic thought and policymaking. Arguing for a three-fold shift in the discipline, he calls for broadening the focus of policy-makers, improvisation in the tools employed by economists and an emphasis on empirical evidence. This new thinking, he says, will contribute to India s accelerated development. New Thinking addresses three concerns of economic thought for a developing

economy: public policy after the crisis, the role of the financial sector in development, and the lessons learnt from world economies. Novel in approach, this volume critically examines India s development strategies and suggests a redefining of the role of the financial sector in accelerating development. The author observations on other developing economies and analyses of the diverse uncertainties enable a comprehensive understanding of the influence of global factors on the reform agenda for India. Reddy s New Thinking is built on experience that is gifted with foresight and understanding of theory. His language is fluid, his ideas objective, his prescriptions visionary. This collection will inspire debates, and encourage fresh perspectives on attaining the desired growth rate in India. As it addresses a readership committed to developments in the Indian economy, his analyses are certain to question some popular convictions on the country s economic thought and policies.

EMPLOYMENT

17 Pankaj, Ashok K.
Right to work and rural India: Working of the
Mahatma Gandhi National Rural
Employment Guarantee Scheme(MGNREGS)
/ edited by Ashok K. Pankaj.-- New Delhi:
Sage Publications, 2012. xxi,383 p.
ISBN: 978-81-321-0899-3.
331.011 P19R O2 46729

Book Description: The Mahatma Gandhi National Rural Employment Guarantee Act is the first of its kind in the world wherein the government guarantees rights-based economic

safety net for two-thirds of the country's population. This comprehensive book is an attempt to understand the working of the operational part of this act—the Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS).

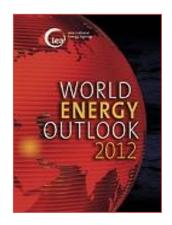

The expert contributors to this book have presented evidences of implementation and impact of the scheme across India, including both agriculturally developed states and the backward ones, and states where the scheme is better implemented as well as those where it is not. Their essays go on to explain the meaning, development-policy context, issues and implications of MGNREGS. In the process, these theoretical and empirical studies highlight the desirability of state-sponsored programme in the era of liberalization and provide viable answers to question pertaining to the timing and purpose as well as the likely impacts of such a massive wage employment and public works programme as the MGNREGS.

This volume offers an insight into the changing thrust of India's anti-poverty programme and her experiments with various employment schemes.

ENERGY

18 International Energy Agency
World energy outlook 2012 / International
Energy Agency.-France: IEA, 2012. 668 p.
ISBN: 978-92-64-18084-0.
333.79 In8W Q2 46796

Book Description: Industry and government decision-makers and others with a stake in the energy sector all need WEO-2012. It presents authoritative projections of energy trends through to 2035 and insights into what they mean for energy security, environmental sustainability and economic development.

Oil, coal, natural gas, renewables and nuclear power are all covered, together with an update on climate change issues. Global energy demand, production, trade, investment and carbon dioxide emissions are broken down by region or country, by fuel and by sector.

Special strategic analyses cover

- -What unlocking the purely economic potential for energy efficiency could do, country by country and sector by sector, for energy markets, the economy and the environment.
- -The Iraqi energy sector, examining both its importance in satisfying the country's own needs and its crucial role in meeting global oil and gas demand.
- -An examination of the cost of delaying action on climate change.
- -The water-energy nexus, as water resources become increasingly stressed and access more contentious.
- -Measures of progress towards providing universal access to modern energy services.

There are many uncertainties; but many decisions cannot wait. The insights of WEO 2012 are invaluable to those who must shape our energy future.

** Energy; Natural gas; Power sector; Climate change; Energy efficiency; Energy projections

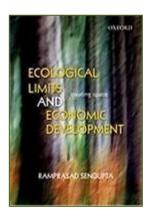

ENVIRONMENTAL ECONOMICS

19 Sengupta, Ramprasad

Ecological limits and economic development: Creating space / by Ramprasad Sengupta.--

New Delhi: OUP, 2013. xxvi,365 p.

ISBN: 978-0-19-808165-4. 333.7 Se5E Q3 46664

Book Description: The relationship between human civilization and nature is complex. It has been exacerbated in the present times by the continued transformation and utilization of predominantly exhaustive resources to attain economic prosperity. This book provides a comprehensive analysis of the role of ecological constraints in limiting development, and examines how this can be overcome in a sustainable manner. Combining a behavioural analysis of resource dynamics with normative policy discussions of their sustainable use, it explores the linkages between the biosphere and economic systems.

The book engages with a wide range of contemporary development issues, both at the conceptual as well as at the applied level, especially in the Indian context:

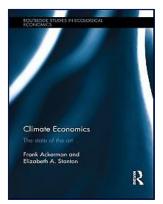

- How policies can address expansion of scale due to ecological limits and the issue of equitable sharing of resources
- The role of scientific knowledge, technology, social norms, and culture in creating and expanding the space for economic development
- The interactive dynamics of population, economic growth, and use and distribution of major natural resources—land and soil, water, forests, biodiversity, energy, and non-energy resources
- The issue of global warming and climate change

** Environmental economics; Ecology; Economic development-Environmental aspects; Sustainable development; Land use; Water resources; Forests; Biodiversity; Energy; Climate change

20 Ackerman, Frank

Climate economics: the state of the art / by Frank Ackerman and Elizabeth A. Stanton.--London: Routledge 2013. ix,187 p. (Routledge studies in ecological economics 27)

ISBN: 978-0-415-63718-3. 363.73874 Ac5C Q3 46807

Book Description: Climate science paints a bleak picture: The continued growth of greenhouse gas emissions is increasingly likely to cause irreversible and catastrophic effects. Urgent action is needed to prepare for the initial rounds of climatic change, which are already unstoppable. While the opportunity to avert all climate damage has now passed, well-designed mitigation and adaptation policies, if adopted quickly, could still greatly reduce the likelihood of the most tragic and far-reaching impacts of climate change.

Climate economics is the bridge between science and policy, translating scientific predictions about physical systems into projections about economic growth and human welfare that decision makers can most readily use but it has too often consisted of an overly technical, academic approach to the problem.

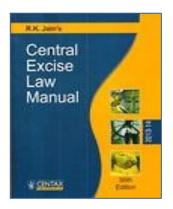

Getting climate economics right is not about publishing the cleverest article of the year but rather about helping solve the dilemma of the century. The tasks ahead are daunting, and failure, unfortunately, is quite possible. Better approaches to climate economics will allow economists to be part of the solution rather than part of the problem. This book analyzes potential paths for improvement.

FINANCIAL CRISES

23 Tarapore, S.S.

Commentary on India's recent financial policies / by S.S.Tarapore.-- New Delhi: Academic Foundation, 2013. 334 p.

ISBN: 978-81-7188-966-2. 332.0954 T17C Q3 46797

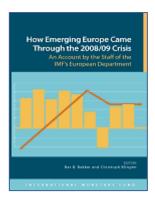

Book Description: This book provides a commentary on recent financial policies covering macroeconomic perspectives, external monetary-fiscal policies, sector policies, particularly exchange rate management and gold. The collection would be of interest to the general reader with broad interest in financial policies policymaker, opinion makers, banks financial institutions, academics and students of finance.

** Financial crises; Global financial crises; Monetary policy; Fiscal policy; Banks and banking

24 How emerging Europe came through the 2008/09 crisis: An account by the staff of the IMF's European department / edited by Bas B. Bakker and Christoph Klingen.--Washington: IMF, 2012. xx,328 p.

ISBN: 978-1-61635-381-0. 332.094 B17H Q2 I1612

Book Description: Emerging Europe was particularly hard hit by the global financial crisis, but a concerted effort by local policymakers and the international community staved off impending financial meltdown and laid the foundations for renewed convergence with western Europe. This book, written by staff of the IMF's European Department that worked on the region at the time, provides a unique account of events: the origins of the crisis and the pre-crisis policy setting; the crisis trigger and the scramble to avoid the worst; the stabilization and recovery; the remaining challenges; and the lessons for the future. Five regional chapters provide the analytics to put events into perspective. Dedicated chapters for all 19 countries of the region dig deeper into the idiosyncrasies of each economy and provide extensive economic data. A final chapter distills the lessons from the overall regional experience and the wide intraregional diversity. Taken together, they make this book an indispensible reference for economic scholars of the region and beyond.

FINANCIAL MANAGEMENT

25 Financial management in the public sector / edited by Justin Marlowe and David S.T. Matkin.-- London: Sage Publications Ltd., 2013. V.1: xxxv,314; V.2: vi,383; V.3: vi,358; V.4: vi,385 p. (Sage library of the public sector).

ISBN : 978-1-4462-5589-6(set of four volumes). 352.4 M34F Q3.1-4(R) 46808-46811

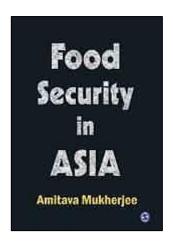

Book Description: The study of public financial management is essential to improving the practice of public management and to our understanding of the politics and organization of public institutions. As a study of the practice of public management, the literature of public financial management closely scrutinizes developing trends and standards in various of expertise, such as budgeting. accounting, and taxation. As a study of politics and organization of public institutions, the literature of public financial management examines the salience of financial resources and their management in the allocation and use of political authority.

This four-volume set aims to address the sophistication and breadth of issues in this fast-developing area of study, bringing together seminal works on both practice-centric research and research that speaks to broader public management concerns. Above all this major work represents an invaluable resource which can be used to educate readers toward the practice and institutional effects of public financial management

FOOD SECURITY

26 Mukherjee, Amitava Food security in Asia / by Amitava Mukherjee.-- New Delhi: Sage Publications, 2012. xxi,391 p. ISBN: 978-81-321-0906-8. 338.195 M89F Q2 46727

Book Description: As one of the major challenges of the 21st century, food security requires nations to maintain food production at appropriate levels, provide potable water, and at once, ensure access of people to such food and water. Food suppliers also need to ensure year-long supply of food at optimum price and of high quality, both for needy and for discerning customers.

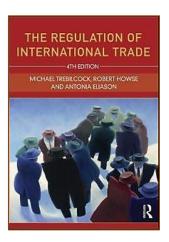

Food Security Asia provides comprehensive analysis of the critical dimensions of food security in various countries of Asia. It compellingly argues that food insecurity is a complex phenomenon that requires comprehensive response a encompassing, inter alia, increasing food production, expanding economic and social access to food, special access to food for disadvantaged groups and, most importantly, breaking down the gender-based barriers to accessing food.

The book discusses the major governmental policies in relation to the communities' responses. While highlighting the pressure exerted by climate change and world population growth, it also propounds ideas that would help in making informed policy choices.

FOREIGN TRADE REGULATION

27 Trebilcock, Michael Regulation of international trade / by Michael Trebilcock, Robert Howse, Antonia Eliason. ed. 4-- London: Routledge, 2013. x,948 p. ISBN: 978-0-415-61090-2. 343.087 T72R Q3 46805

Book Description: Drawing on a wide variety of classic and contemporary sources, respected authors Trebilcock and Howse here provide a critical analysis of the institutions and agreements that have shaped international trade rules. In light of the growing debate over globalization, they include special sections examinations of topics such as:

- * agriculture
- * services and trade-related intellectual property rights
- * labor rights
- * the environment
- * migration.
- *competition

Drawing on previous highly praised editions, this comprehensive text is an invaluable guide to students of economics, law, politics and international relations. Now fully updated, this fourth edition includes full coverage of new developments including the Doha trade round, the proliferation of preferential trade agreements, the debate on trade, climate change and green energy, the response of the trading system to the 2007-2010 financial and economic crisis, the controversy over trade and exchange rate manipulation, and the growing body of WTO dispute resolution case law.

HEALTH CARE

28 Getzen, Thomas E.

Health economics and financing / by Thomas E. Getzen.—ed 5-- NJ: John Wiley & Sons,

2013. xxvii,468 p.

ISBN: 978-1-118-18490-5. 362.1 G33H Q3 46803

Book Description: Getzen's 5th edition of Health Economics and Financing is a primer for the economic analysis of medical markets that engages the central economic issues of the health economics and financing field. It provides principles and concepts of health economics rather and limited research methods, use of attribution, footnotes and references. Furthermore, this edition offers a strengthened macro section along with additional material on the ACA (Health Reform) as it is such a relevant topic today. This book draws upon the work of many scholars, but in keeping with its design as a primer for introducing students to the principles and concepts of health economics rather than its literature and research methods. the use of attribution, footnotes, and references is purposely limited.

INFRASTRUCTURE

29 IDFC Foundation

India infrastructure report 2012: Private sector in education / IDFC Foundation.-- New Delhi: Routledge, 2013 xxxviii,267 p.

ISBN: 978-0-415-83721-7.

380.1406054 In3I Q3 46793

Book Description: Today, India's education sector remains a victim of poor policies, restrictive regulations and orthodoxy. Despite being enrolled in schools, children are not learning adequately. Increasingly, parents are seeking alternatives through private inputs in school and tuition. Students are dropping out from secondary school in spite of high financial returns of secondary education, and those who do complete it have inferior conceptual knowledge. Higher education is over-regulated and under-governed, keeping away serious private providers and reputed global institutes. Graduates from high schools, colleges and universities are not readily employable, and few are willing to pay for skill development. Ironically, the Right to Education Act, if strictly enforced, will result in closure of thousands of non-state schools, and millions of poor children will be left without access to education.

Eleventh in the series, India Infrastructure Report 2012 discusses challenges in the education sector — elementary, secondary, higher, and vocational — and explores strategies for constructive change and opportunities for the private sector. It suggests that immediate steps are required to reform the sector to reap the benefits from India's 'demographic dividend' due to a rise in the working age population.

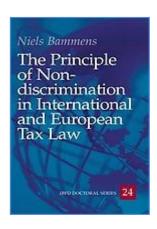

Result of a collective effort led by the IDFC Foundation, this Report brings together a range of perspectives from academics, researchers and practitioners committed to enhancing educational practices. It will be an invaluable resource for policymakers, researchers and corporates.

INTERNATIONAL TAX LAW

30 Bammens, Niels Principles of non-discrimination in international and European tax law/by Niels Bammens.-- Netherlands: IBFD, 2012. xx,1130 p.

(IBFD doctoral series 24). ISBN: 978-90-8722-159-1. 341.75 B21P O2 46770

Book Description: The principle of nondiscrimination plays a vital role in international and European tax law. This dissertation analyses the interpretation given to that principle in tax treaty practice and in the direct tax case law of the Court of Justice of the European Union (ECJ) on the fundamental freedoms. The objective of this analysis is twofold: to give a clear and thorough overview of both standards and to determine whether they share a common, underlying principle of non-discrimination. In order to achieve these objectives, a comprehensive selection of case law is discussed from the perspective of the two constitutive elements of discrimination. comparability and the existence of different treatment. Moreover, attention is drawn to the question whether a domestic measure that is found to be discriminatory may nevertheless be justified on the basis of reasons of public

Finally, the possible interplay between both standards is addressed. First, the partial overlap of the two non-discrimination rules may cause frictions. Complex triangular situations are

possible, with conflicting rules giving rise to interpretation problems. A second issue discussed in this context is whether national courts of EU Member States are influenced by ECJ case law on the fundamental freedoms when interpreting the non-discrimination provision in tax treaties. Given the deficiencies of that provision, courts may be tempted to draw inspiration from the European standard. The relevant case law is discussed in order to determine whether there is indeed such an influence, and whether such an influence is appropriate.

32 Baeza-Yates, Ricardo

Modern information retrieval: The concepts and technology behind search / by Ricardo Baeza-Yates and Berthier Ribeiro-Neto.--ed. 2-- England: Addison Wesley, 2011.

xxx,913 p.

ISBN: 978-0-321-41691-9. 025.04 B14M Q1 46748

Book Description: This is a rigorous and complete textbook for a first course on information retrieval from the computer science perspective. It provides an up-to-date student oriented treatment of information retrieval including extensive coverage of new topics such as web retrieval, web crawling, open source search engines and user interfaces.

From parsing to indexing, clustering to classification, retrieval to ranking, and user feedback to retrieval evaluation, all of the most important concepts are carefully introduced and exemplified. The contents and structure of the book have been carefully designed by the two main authors, with individual contributions coming from leading international authorities in the field, including Yoelle Maarek, Senior Director of Yahoo! Research Israel; Dulce Poncele'on IBM Research; and Malcolm Slaney, Yahoo Research USA.

This completely reorganized, revised and enlarged second edition of *Modern Information Retrieval* contains many new chapters and double the number of pages and bibliographic references of the first edition, and a companion website www.mir2ed.org with teaching material. It will prove invaluable to students, professors, researchers, practitioners, and scholars of this fascinating field of information retrieval.

MALTHUSIANISM

33 From Malthus' stagnation to sustained growth: social, demographic and economic factors / edited by Bruno Chiarini and Paolo Malanima.-- New York: Palgrave Macmillan, 2013. v,184 p.

(Central issues in contemporary economic theory and policy).

ISBN: 978-0-230-39248-9. 304.6 C43F O3 46812

Book Description: In recent years it has become apparent that the pattern of population growth is consistent with the predictions of the Malthusian model. Studies on the pre-industrial epoch in a wide range of countries show positive income elasticities of mortality and a strong positive correlation between real wages and marriage rates. Negative shocks to population, such as the Black Death, were reflected in higher real wages and faster population growth. Moreover, the prediction of the Malthusian model that differences in technology should be reflected in population density, but not in standards of living, is also borne out. However, the empirical implications of the Malthusian model are more complex than simply a tendency of real wage to revert to its long-run equilibrium level together with slow population growth. Many factors have impinged on the fertility and mortality rates. A most striking feature of the preindustrial epoch is the simultaneous effect of contradictory forces. This volume studies these forces pushing towards both growth and poverty, and

evaluates the utility of the Malthusian model as a tool for understanding demographic dynamics today.

MONETARY POLICY

34 Aubrey, Thomas

Profiting from monetary policy: Investing through the business cycle / by Thomas Aubrey.-- New York: Palgrave Macmillan, 2013. xii,215 p.

ISBN : 978-1-137-28969-8. 332.46 Au1P O3 46804

Book Description: The Financial Crisis has brought the pensions time bomb center stage due to a decade of low returns increasing unfunded pension liabilities and lowering future retirement incomes. This is because most investors have been unable to avoid the substantial volatility in asset prices and capital destruction that has accompanied the business cvcle. Until investors reject the prevailing monetary policy consensus as an investment framework based on price stability and general equilibrium, pension schemes will continue to suffer poor returns due to periodic downturns. Alternative credit-based disequilibrium frameworks exist, originating with the work of Knut Wicksell that was subsequently developed by the joint winners of the 1974 Nobel Prize, Friedrich Hayek and Gunnar Myrdal. Creditbased frameworks can measure the extent of disequilibrium in an economy signaling to investors when to switch from equities to bonds and vice versa, thus preserving capital as the

business cycle shifts. Empirical analysis on multiple countries demonstrates that investment strategies that track the business cycle generate equity like returns with bond-like volatility. The provision of business cycle tracking funds will therefore at least go some way to defusing the shortfall in pension provision.

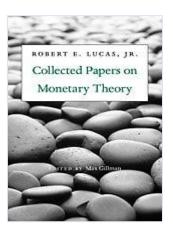

Profiting from Monetary Policy is a highly innovative book that provides new insights on the business cycle and exposes the flaws in current monetary policy. It advocates a new, credit-based framework which can provide investors with the returns they need whilst eliminating the volatility that has plagued the industry in recent years, and will prove to be an invaluable guide for investors in today's post-crisis landscape.

** Monetary policy; Investment; Business cycle; Neo-Wicksellian

35 Lucas, Robert E.

Collected papers on monetary theory / by Robert E. Lucas.-- Cambridge: Harvard University Press, 2013. xxvii,538

ISBN: 978-0-674-06687-8. 332.46 L96C Q3 46801

Book Description: Robert Lucas is one of the outstanding monetary theorists of the past hundred years. Along with Knut Wicksell, Irving Fisher, John Maynard Keynes, James Tobin, and Milton Friedman (his teacher), Lucas revolutionized our understanding of how money interacts with the real economy of production, consumption, and exchange.

Lucas's contributions are both methodological and substantive. Methodologically, he developed dynamic, stochastic, general equilibrium models to analyze economic decision-makers operating through time in a probabilistic complex, environment. Substantively, he incorporated the quantity theory of money into these models and derived its implications for money growth, inflation, and interest rates in the long run. He also showed the different effects of anticipated and unanticipated changes in the stock of money on fluctuations, helped economic and demonstrate that there was not a long-run tradeoff between unemployment and inflation (the Phillips curve) that policy-makers exploit.

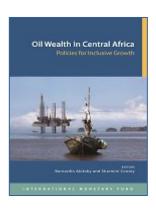

The twenty-one papers collected in this volume fall primarily into three categories: core monetary theory and public finance, asset pricing, and the real effects of monetary instability. Published between 1972 and 2007, they will inspire students and researchers who want to study the work of a master of economic modeling and to advance economics as a pure and applied science.

POLICY SCIENCES

37 Corduneanu-Huci, Cristina
Understanding policy change: How to apply
political economy concepts in practice / by
Cristina Corduneanu-Huci, Alexander
Hamilton, Issel Masses Ferrer.--Washington:
World Bank, 2013. xv,359 p.
ISBN: 978-0-8213-9538-7.
320.6 C81U Q3 46795

Book Description: How does the social and political context in which decision-makers find themselves in affect their ability to realize their reform goals? How does this context facilitate or inhibit specific reform agendas and projects? How can we operationalize and evaluate these risks and opportunities in order to decide what reforms and projects are feasible given the circumstances? This book provides the reader with the full panoply of political economy tools and concepts necessary to understand, analyze, and integrate how political and social factors may influence the success or failure of their policy goals. Starting with the empirical puzzle of why corruption, rent seeking, and a lack of good governance emerge and persist in a host of countries and sectors the book reviews how

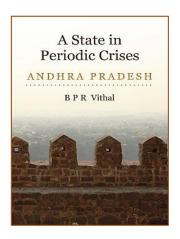

collective action problems and the role of institutions, as well as a host of ancillary political economy concepts can affect the feasibility of different projects. However, the book is not just a one stop shop of political economy concepts, but also provides practical advice on how to organize and use this information via the introduction of stakeholder mapping tools and the development of an actionable political economy toolkit. In other words researchers, graduate students, and policy practitioners interested in understanding, the what, the why and the how of policy reform will find this book an essential tool.

POLITICS AND GOVERNMENT

38 Vithal, B.P.R.
State in periodic crises Andhra Pradesh / by B.P.R.Vithal.-- New Delhi: Academic Foundation, 2012. 146 p.
ISBN: 9788171888979.

954.84 V33S Q2 46740

Book Description: Agitations and political crises are not new to the Indian state of Andhra Pradesh: its very existence has been challenged by repeated confrontations. This book is a compilation of essays, speeches, and official notes from an individual who has been intimately associated with the state's development, from its initial formation and its planning and development to the Telangana region's separatist challenges first articulated in the late 1960s. Without taking sides on the question of Andhra Pradesh's future, this account examines the basis of its persistent

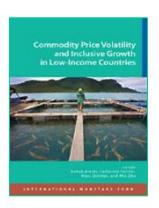

grievances and the social, political, economic, and emotional foundations of its statehood.

PRICES

39 Commodity price volatility and inclusive growth in low-income countries / edited by Rabah Arezki and...[et al.].-- Washington: IMF, 2012. xxiv,384 p.

ISBN: 978-1-61635-379-7. 338.52 Ar3C Q2 I1611

Book Description: In the years following the global financial crisis, many low-income countries experienced rapid recovery and strong economic growth. However, many are now facing enormous difficulties because of rapidly rising food and fuel prices, with the threat of millions of people being pushed into poverty around the globe. The risk of continued food price volatility is a systemic challenge, and a failure in one country has been shown to have a profound impact on entire regions. This volume addresses the challenges of commodity price volatility for low-income countries and explores some macroeconomic policy options for responding to commodity price shocks. The book then looks at inclusive growth policies to address inequality in commodity-exporting countries, particularly natural resource rich countries. Perspectives from the Middle East and North Africa, sub-Saharan emerging Asia, and Mexico are presented and, finally, the role of the international donor community is examined. This volume is a must read for policymakers everywhere, from those in advanced, donor countries to those in

countries with the poorest and most vulnerable populations.

PUBLIC ADMINISTRATION

40 United Nations, Department of Economic and Social Affairs

United Nations E-Government survey 2012: E-Government for the people / United Nations, Department of Economic and Social Affairs.-- New York: United Nations, 2012. xiii,142 p.

ISBN: 978-92-1-123190-8. 352.3802854678 Un3U O2 46791

Book Description: The United Nations E-Government Survey 2012 finds that many have put in place e-government initiatives and information and communication technologies applications for the people to further enhance public sector efficiencies and streamline governance systems to support sustainable development. Among the e-government leaders, innovative technology solutions have gained special recognition as the means to revitalize lagging economic and social sectors. The overall conclusion that emerges from the 2012 Survey in today's recessionary world climate is that while it is important to continue with service delivery, governments must increasingly begin to rethink in terms of e government – and e-governance – placing greater emphasis on institutional linkages between and among the tiered government structures in a bid to create synergy for sustainable development. inclusive important aspect of this approach is to widen the scope of e-government for a transformative role of the government towards cohesive, coordinated, and integrated processes and

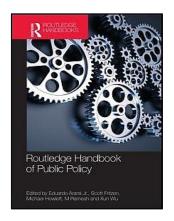

institutions through which such sustainable development takes place.

42 Smith, Kevin B.

Public policy theory primer / by Kevin B. Smith and Christopher W. Larimer.--ed. 2-Boulder: Westview Press,2013. ix,273 p. ISBN: 978-0-8133-4749-3.

320.6 Sm4P Q3 46813

Book Description: Public policy has developed into a broad and interdisciplinary area of study. Research in the field tends to reflect this wide-ranging nature, with scholarly activity focusing on policy process, policy design, program evaluation, specific policy issues, and research classified simply as "policy studies." Yet for those teaching and studying in the field, the disjointed nature of the Field can be confusing and cumbersome.

This text provides a reasoned and structured framework for the field of public policy. Authors Kevin B. Smith and Christopher W. Larimer not only discuss several major theories but also offer a consistent and coherent framework for uniting the field. This organized and comprehensive approach addresses core questions and concepts, major theoretical frameworks, primary methodological approaches, and key controversies and debates. In the second edition, the authors cover new approaches to typologies, behavioral economics and decision making, social media and social analysis, updates network social construction theory, and many other new themes in each of the book's ten chapters. The Policy Theory Primer indispensable text for the systematic study of public policy.

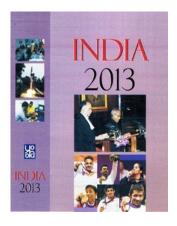

** Public policy; Policy making; Policy process

TAXATION

44 OECD model tax convention on income and on capital and key tax features of member countries 2012 / edited by Andrei Cracea.-- Netherlands: IBFD, 2012. 874 p. (IBFD tax travel companions).

ISBN: 978-90-8722-149-2. 336.24 C840 Q2 46762

Book Description: This book contains the official text of the OECD Model Tax Convention on Income and on Capital (2010 condensed version), together with the relevant 2012 updated country tax summaries and treaty charts. In addition, the book is supplemented with a current list and short description of previous OECD reports related to the Model Tax Convention.

The country tax summaries provide a concise description of the current direct taxes levied in each OECD Member country, including taxes on corporate income, individual income and capital. Under each of these headings, the domestic situation is described followed by international aspects (both the situation of a resident taxpayer receiving income from abroad and that of a non-resident receiving income from the relevant country).

The fully up-to-date charts provide a simple tool to quickly determine the corporate tax rates and domestic and treaty withholding tax rates on dividends, interest and royalties.

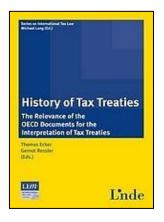

With ease of use in mind, this book provides a complete and handy reference for all of those dealing with international taxation.

** Taxation; International taxation-OECD countries; Income tax

45 History of tax treaties: The relevance of the OECD documents for the interpretation of tax treaties / edited by Thomas Ecker and Gernot Ressler.-- Germany: Lindeverlag, 2011. 734 p.

(Series on international tax law Volume 69).

ISBN: 978-3-7073-2011-4. 341.75 Ec5H O1 46529

Book Description: This book provides an historical in-depth analysis for each provision in the OECD MC. It offers a refurbished presentation of the history and internal processes of the international organizations involved in the tax treaty models' development. This historical analysis helps the reader understand the design and content of certain provisions, as well as their role in the system as a whole. As such, the value of an historical analysis goes far beyond mere understanding of it also past: provides tools interpretation. By using those tools, one can solve numerous current interpretation issues and gain new insights for future improvements of the OECD MC.

46 Horizontal tax coordination / edited by Michael Lang and...[et al.].-- Netherlands: IBFD, 2012 . xviii,356 p. ISBN: 978-90-8722-155-3. 336.2 L25H Q2 46769

Book Description: This book is the result of a research project entitled "Horizontal Tax

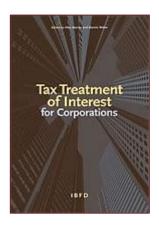

Coordination within the EU and within States" that was conducted by the Institute for Austrian and International Tax Law at WU (Vienna University of Economics and Business). The aim of this project was to examine the role court judgments have played in the framework of tax harmonization in federal states and how decisive this impact was.

In this respect the participants took also a closer look at ECJ case law and how it may be compared to other jurisdictions where federal fiscal structures exist, such as the United States, Switzerland, Belgium, Spain, Austria, Russia, Mexico, Brazil, India and Australia. The judgments of the various courts were contrasted with each other in order to learn more about the impact on harmonization in the field of tax law. From these findings conclusions for the purpose of EU tax policy were drawn.

47 Tax treatment of interest for corporations / edited by Otto Marres and Denis Weber.-Netherlands: IBFD, 2012. xiv,246p ISBN: 978-90-8722-162-1.

336.243 M34T Q2 46767

Book Description: The tax treatment of interest for corporations continues to engage both tax academics and tax practitioners. In Tax Treatment of Interest for Corporations various aspects of this matter (interest deduction limitations, discriminatory treatment of equity versus debt, preferential tax regimes on group interest income and withholding tax on interest) are dealt with from different perspectives, including economics, tax policy, comparative law, and EU and international law.

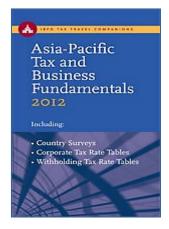

Prominent practitioners and academics give their views on the tax treatment of interest. Subjects discussed are:

- •The debt/equity distinction in corporate taxation from a legal and economic perspective
- •CBIT (comprehensive business income tax) versus ACE (allowance for corporate equity)
- •The concept of interest in tax treaties
- •The notional interest deduction (Belgium)
- •Thin capitalization in Brazil
- •Earnings stripping (Germany)
- •Interest deduction in Denmark
- •Withholding tax on interest within the EU: gross or net?
- •Thin cap rules from an EU perspective
- •EU State aid and the EU Code of Conduct combating harmful tax competition
- •ACTL conference report on tax treatment of interest for corporations

Tax Treatment of Interest for Corporations is a unique combination of academic and practical discussions of economic and policy issues, domestic legislation, EU law and tax treaty law.

** Taxation ; Corporate taxation ; Tax treaties

48 Asia-Pacific tax and business fundamentals 2012/edited by Mei-June Soo.--Netherlands: IBFD, 2012. vi,631 p. (IBFD tax travel companions). Including country surveys, corporate tax rate tables, withholding tax rate tables. ISBN: 978-90-8722-161-4. 336.2095 So6A Q2 46763

Book Description: The Asia-Pacific region provides unique opportunities and challenges for businesses and individuals operating in its diverse economies

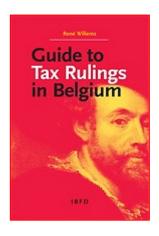

Updated annually, this book provides an overview of direct and indirect taxes levied on corporate and individual income and on capital in 15 selected countries in the region, as well as information on various aspects of doing business in these countries. The book is an valuable reference tool for those businesses and individuals with an active interest in the Asia-Pacific region.

Up-to-date tables provide a simple tool to quickly determine corporate tax rates, and domestic and treaty withholding tax rates on dividends, interest and royalties. The information in the book is presented in a concise and standard layout which allows quick and easy comparisons between countries.

The book, published in a convenient, pocketsized format, is just one of the titles in the IBFD Tax Travel Companions series.

49 Willems, Rene Guide to tax rulings in Belgium / by Rene Willems.--Netherlands: IBFD, 2012. xxiv,378 p. ISBN: 978-90-8722-157-7. 343.0409493 W66G O2 46768

Book Description: Belgium is a leading business center, due to its geographical location at the heart of Europe, its multicultural population and its history. Multinational corporations (MNCs), both foreign and home grown, constitute the engine of Belgium's economy, making Belgium one of the most globalized countries in the world. With its large number of foreign investors, Belgium's tax legislators are aware of the importance of upfront legal certainty and, for this reason, the

legal framework for a general formal rulings system was introduced as from 2003.

Guide to Tax Rulings in Belgium provides a unique insight into the Belgian tax structure and its world-class tax rulings system. The book begins with a high-level overview of the main tax issues that investors might face and a description of the Belgian tax rulings system. From a business perspective, the book sets out how tax rulings can support investors in establishing, operating or changing their business infrastructure in Belgium. The book gives numerous examples of successful cases and shows how tax rulings can proactively underpin investors' specific solutions.

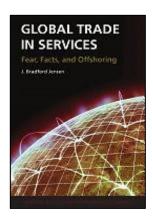

Tax rulings are a very powerful risk management instrument, and Guide to Tax Rulings in Belgium demonstrates how a smart use of the Belgian rulings system can proactively support businesses. Tax advisers worldwide can benefit from the transparency of the robust Belgian rulings practice as a source of inspiration: e.g. in the field of transfer pricing, multiple rulings provide concrete cases of Belgian solutions to transfer pricing issues in line with the OECD Guidelines.

The book is a valuable guide for MNCs already present in Belgium, foreign direct investors interested in having a presence and inbound investments in Belgium, tax advisers worldwide, and business people.

TRADE

50 Jensen, J. Bradford
Global trade in services: Fear, facts, and
offshoring / by J. Bradford Jensen.-Washington: Peterson Institute
for International Economics, 2011. xix,245 p.
ISBN: 978-0-88132-601-7.
382.45000973 J45G Q1 46663

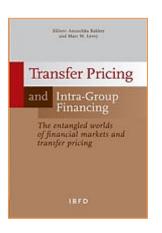

Book Description: How vulnerable are US workers to the effects of outsourcing? Are Americans going to lose jobs in areas like telecommunications, services, software development and engineering to lowsalary countries like India and China? In a compelling new book J. Bradford Jensen demonstrates that the answer is no. He argues that the United States should embrace trade in services and aggressively pursue liberalization in the service sector. In fact, the United States and the world have much to gain and little to lose if trade in services is liberalized. Using the most current information on the services sector, Jensen shows that even though service sector jobs pay high wages, these jobs are not likely to be lost to lower-wage workers in other countries. Indeed, precisely because high-wage service sector jobs require highly skilled workers, the U.S. is likely to retain these jobs. Fear and Offshoring: The Facts on Global Services Outsourcing investigates the poorly understood phenomenon of services outsourcing and develops a comprehensive picture of its size, scope, and impact.

TRANSFER PRICING

51 Transfer pricing and intra-group financing: The entangled worlds of financial markets and transfer pricing / edited by Anuschka Bakker and Marc M. Levey.-Netherlands: IBFD, 2012. xxxiv,558 p. ISBN: 978-90-8722-152-2.
338.88 B17T Q2 46766

Book Description: Transfer Pricing and Intra-Group Financing is a practical guide that addresses the transfer pricing issues related to intra-group financing transactions. Currently, authorities and transfer professionals are focusing on these transactions - and the application of the arm's length principle. This growing attention is largely dictated by two factors: (i) the relative importance that financial transactions have in groups and the significant multinational amounts involved; and (ii) the increased awareness of tax authorities (and taxpayers alike) who, having for many years primarily dealt with transfer pricing issues related to goods and services, are now being confronted with the complexity of the pricing of these financial transactions. The so-called "credit crunch", which began in late 2007 and in mid-2008 exploded on the financial services industry and the global economy, has also heavily influenced this field of application of the arm's length principle. The impact of the financial markets on this area of transfer pricing continues today.

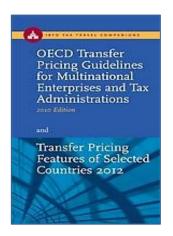

The book starts with an introductory chapter the financial markets, treasury covering functions. economic theory underlying financial transactions and the OECD framework regarding financial instruments. Country chapters detail not only the transfer pricing consequences of financial instruments (e.g. profit participating loans, guarantee fees, cash pooling, factoring, leasing) but also present ideas on how a transfer pricing policy could be constructed for these transactions. The increased likelihood of tax disputes resulting from intercompany financing arrangements reinforces taxpayers' need to revisit existing arrangements and implement policies and

procedures that are in line with the new market circumstances and the varying approaches to this issue. Tools to address, substantiate and price intercompany financial transactions are provided throughout the book. Furthermore, practical anecdotes, diagrams and tables are intertwined into the analysis to give the reader some working knowledge of transfer pricing issues related to intra-group financing.

This book is an invaluable resource for tax practitioners, tax lawyers, tax managers, tax directors of corporations, treasurers and tax authorities, in all facets of transfer pricing and intra-group financing.

- 52 OECD transfer pricing guidelines for multinational enterprises and tax administrations and transfer pricing features of selected countries 2012 / edited by Kamlesh Susarla and Antoine Glaize.— Netherlands: IBFD, 2012.

(IBFD tax travel companions). ISBN: 978-90-8722-151-5. 338.88 Su8O Q2 46764

Book Description: This book, in addition to containing the OECD's Transfer Pricing Guidelines, provides an excellent overview of transfer pricing rules and regulations in 36 countries and is a handy guide for those actively working in the field of transfer pricing. The increase in global trade and foreign direct investment has seen a large rise in companies operating across national borders. The growth of these multinational companies (MNCs) has been closely followed by the issue of inter-

company transfer prices being used to reduce taxable profits. Today, transfer pricing is one of the most important issues facing MNCs as they attempt to fairly distribute their profits amongst each company in the group while dealing with tax authorities who are implementing transfer pricing regulations and strengthening enforcement in order to prevent a loss of revenue. The result of this is that transfer pricing controversies have become a major tax issue for companies.

VALUE ADDED TAX

53 EU vat compass 2012/2013 / edited by Walter van der Corput & Fabiola Annacondia.-- Netherlands: IBFD, 2012. vi,682 (IBFD tax travel companions). ISBN: 978-90-8722-146-1. 336.2712094 V28E Q2 46765

Book Description: Encompassing the most important features of the European Union's VAT system, the EU VAT Compass 2012/2013 is an essential source of reference for all those actively working or interested in VAT. The book consists of three parts, each comprising a vital element of the EU VAT system.

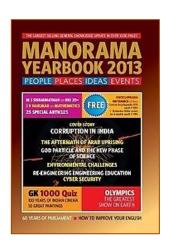

Part One presents the consolidated text of the current EU VAT Directive (No. 2006/112), as most recently amended by Directive 2010/88; it also contains the texts of several other Directives in the field of VAT. All future amendments to be made to the basic VAT Directive under Directives 2008/8 and 2010/45, and the text of Implementing Regulation 282/2011 are included.

For the interpretation of the EU VAT legislation, the case law of the Court of Justice of the European Union (ECJ) is an indispensable element. Part Two provides an overview of both the operative parts of the more than 500 ECJ judgments in VAT cases and the pending cases that are expected to lead to judgments in the course of 2012 and 2013. The book concludes with an overview of the options laid down by the VAT Directive that have been taken up by the individual Member States. This comprehensive analysis covers all 27 Member States.
