Global financial stability report: Is growth at risk? / International Monetary Fund.. - Washington: IMF, 2017. xv,118; (World economic and financial surveys))) October.

ISBN : 978-1-48430-839-4.

I1777

Book Description: The October 2017 Global Financial Stability Report finds that the global financial system continues to strengthen in response to extraordinary policy support, regulatory enhancements, and the cyclical upturn in growth. It also includes a chapter that examines the short- and medium-term implications for economic growth and financial stability of the past decades' rise in household debt. It documents large differences in household debt-to-GDP ratios across countries but a common increasing trajectory that was moderated but not reversed by the global financial crisis. Another chapter develops a new macroeconomic measure of financial stability by linking financial conditions to the probability distribution of future GDP growth and applies it to a set of 20 major advanced and emerging market economies.

The chapter shows that changes in financial conditions shift the whole distribution of future GDP growth.

ECONOMIC DEVELOPMENT

2. Unleashing growth and strengthening resilience in the Caribbean / edited by Trevor Alleyne and...[et al.]. - Washington: IMF, 2017. xii,364; ISBN : 978-1-48431-519-4.

Book Description: This book provides a diagnosis of the central economic and financial challenges facing Caribbean policymakers and offers broad policy recommendations for promoting a sustained and inclusive increase in economic well-being. The analysis highlights the need for Caribbean economies to make a concerted effort to break the feedback loops between weak macroeconomic fundamentals, notably pertaining to fiscal positions and financial sector strains, and structural impediments, such as high electricity costs, limited financial deepening, violent crime, and brain drain, which have depressed private investment and growth. A recurring theme

in the book is the need for greater regional coordination in finding solutions to address the Caribbean's shared and intertwined macroeconomic and structural challenges. The analysis suggests that strengthening regional and global market integration of Caribbean economies would provide an impetus to sustained growth in incomes and jobs. Greater regional and global economic integration would also facilitate structural transformation and a shift toward new economic activities, resulting in more diversified and less vulnerable economies. A central challenge for the Caribbean is thus to come together as a region, overcome the limitations posed by size, and garner the benefits of globalization. Efforts should build on existing regional arrangements; accelerating progress in implementing these agreements would stimulate trade. Policymakers could also promote deeper integration with Latin America and the rest of the world by pursuing new trade agreements, leveraging current agreements more effectively, or deepening them to include areas beyond traditional trade issues, and developing port and transport infrastructure.

Fiscal rules: Coping with revenue volatility in Lesotho and Swaziland / by Jiro Honda and...[et al.].. - Washington: IMF, 2017. ix,42; African department. ISBN : 9781484309575. 336.3 H75F Q7 I1776

Book Description: Over the past decade, Lesotho and Swaziland have faced significant volatility in their fiscal revenues, owing to highly unstable Southern African Customs Union (SACU) receipts. Based on model analysis, this paper explores the advantages of implementing fiscal rules to deal with such volatility. It finds that the use of a structural balance target could smooth the growth impact from revenue shocks while helping preserve sufficient international reserves during bad times. From a long-term perspective, it suggests possible welfare gains from introducing fiscal rules. Last, it concludes that, based on experiences in other countries, developing strong institutions and improving public financial management are necessary steps to ease the transitions to a rules-based fiscal policy framework.

7. Finance and investment: The European case / edited by Colin Mayer and...[et al.]. - Oxford: OUP, 2018. xxxii,392; ISBN : 978-0-19-881582-2. 332.6094 M31P Q8 49981

Book Description: Low growth, low investment, insufficient spend on infrastructure, weak bank lending to the corporate sector, and funding deficiencies of small and medium-sized enterprises are all causes of concern in Europe. To many, they point to fundamental problems in the financing of European companies and in Europe's financial systems. Are these concerns valid and do the structure and performance of the financial system lie at their heart? If so, what should be done to address them, and have the right policy prescriptions been identified to date?

A product of the Restarting European Investment Finance research programme, *Finance and Investment: The European Case* brings together leading researchers to consider the causes of the persistently low level of investment in Europe. It examines the extent to which the financial system is a contributory factor and identifies possible remedies, considering the relation of finance to corporate sector investment, the lending behaviour of banks, the provision of equity financing, and the role of public sector institutions, regulation, and taxation.

Finance and Investment provides one of the most comprehensive and thorough analyses of any financial system undertaken to date. It reflects a large body of research using new and existing data sets, employing

advanced empirical tools, and exploiting the unique insights provided by the tumultuous events of financial and sovereign debt crises. Together, they comprise an exceptional body of knowledge to advance academic thinking and guide policy formulation.

Book Description: The difficulty of finding solutions After six decades of policy-making and planning that appear perfect on paper, vast pockets of poverty persist across the country, accompanied by low human development indices. In *Poor but Spirited in Karimnagar*, Sumita Dawra recounts her experiences as collector in the district of Karimnagar in Andhra Pradesh, and grapples with the question of why even with crores of rupees of government funding, well-meaning implementing agencies and constructive action, this wide gap between intention and results continues. The stories cover diverse populations, from child labour to cotton farmers, from coal miners to malnourished power loom weavers. They traverse the thick Naxal-infested forests, course along the Godavari, and meander through the 'multiple urban worlds' of

Ramagundem and the dry upland areas of Sircilla, examining the key issues that need to be addressed. Each chapter, divided into three sections - identifying the problem, providing the context, and offering the solution, along with a useful statistical guide that provides a quick overview - looks at the key points of lacunae in service delivery in the concerned areas and provides a starting point for a more effective engagement in the tackling of the problems. Based on successful models of governance within the country and elsewhere, this book from a seasoned bureaucrat offers a fresh, contemporary perspective on administration and governance.

Fiscal monitor: Tackling inequality / International Monetary Fund.. - Washington: IMF, 2017. xi,114; (World economic and financial surveys)) October.

ISBN : 978-1-48431-248-3.

I1775

Book Description: At the global level, inequality has declined substantially over the past three decades, but within national boundaries, the picture is mixed: some countries have experienced a reduction in inequality while others, particularly advanced economies, have seen a significant increase that has, among other things, contributed to growing public backlash against globalization. Excessive levels of inequality can erode social cohesion, lead to political polarization, and ultimately lower

economic growth, but whether inequality is excessive depends on country-specific factors, including the growth context in which inequality arises, along with societal preferences. This Fiscal Monitor focuses on how fiscal policy can help governments address high levels of inequality while minimizing potential trade-offs between efficiency and equity. It documents recent trends in income inequality, including inequality both between and within countries, then examines the redistributive role of fiscal policies over recent decades and underscores the importance of appropriate design to minimize any efficiency costs. It then focuses on some key components of fiscal redistribution: progressivity of income taxation, universal basic income, and public spending policies for achieving more equitable education and health outcomes. The analysis relies on the existing theoretical and empirical literature, IMF work on inequality and fiscal policy, country experiences, and new analytical work, including various static microsimulation analyses based on household survey data. Simulations using a dynamic general equilibrium model calibrated to country-specific data and behavioral parameters illustrate the potential impact of alternative budget-neutral tax and transfer measures on income inequality and economic growth
