## BANKS AND BANKING

### 1. Subbarao, Duvvuri

*Who moved my interest rates?: Leading the Reserve Bank of India through five turbulent years / by Duvvuri Subbarao.. - New Delhi: Penguin Books India Pvt.Ltd., 2016. xxv,323; ISBN : 978-0-143-42907-4. 332.110954 Su4W Q6 49904*

**Book Description:** Duvvuri Subbarao's term as the governor of the Reserve Bank of India from 2008 to 2013 was by all accounts an unusually turbulent period for the world and for India. The global financial crisis erupted within a week of his assuming office. Then, just as the impact of the crisis on India ebbed, the action shifted to combating a decade-high, stubborn inflation during 2009-11, which segued into a battle against a sharp depreciation of the rupee starting mid-2012. Who Moved My Interest Rate is an insider's account of the dilemmas and quandaries Subbarao confronted while leading the Reserve Bank through these extraordinary economic and political challenges. Subbarao's five years at the Reserve Bank also marked an intellectually vigorous period for central banking around the world. Not only did the global financial crisis test the policy force of central banks, but it also raised several questions about the breadth of their mandates and the limitations

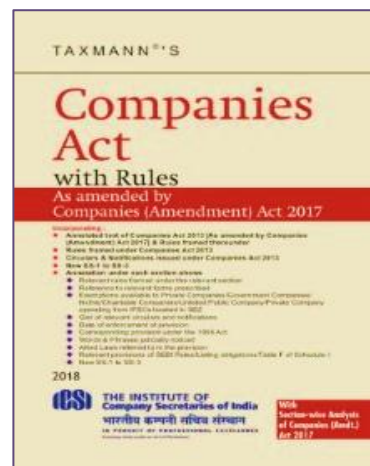

of their autonomy and accountability. While much of the existing debate is set in the advanced economy context, Who Moved My Interest Rate places these issues squarely in an Indian and emerging market perspective. This is also a compelling chronicle of Subbarao's attempts to demystify the Reserve Bank and explain to the public its impact on their everyday lives. Honest, authoritative and deeply insightful, this book enhances our understanding of what is, arguably, one of India's most trusted institutions.

## GOODS AND SERVICES TAX

**9. Bhattacharjee, Govind**

***GST and its aftermath: Is consumer really the king? / by Govind Bhattacharjee and Debasis Bhattacharya.. - New Delhi: Sage Publications, 2018. xx,220; ISBN : 978-93-528-0647-8. 336.2710954 B46G Q8 49880***

**Book Description:** GST and Its Aftermath: Is Consumer Really the King? takes a close look at the ongoing debate on the indirect tax reform initiative in India. It explains in simple, layperson parlance the complex structure of indirect taxation in India—both in the past and in the present—and sheds light on the various dimensions of the tax system and how it

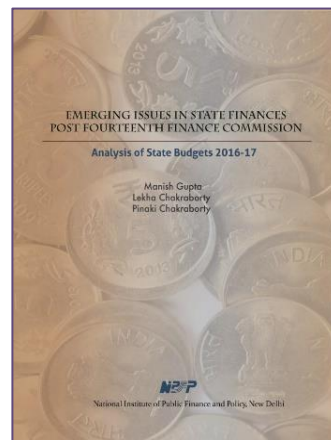

affects all our lives. This thought-provoking assessment of GST presents the ideas and concepts that gave birth to this new system of taxation and discusses its immediate implications on the Indian economy.

**\*\*1. Goods and services tax(GST) 2. Indirect taxation 3. Taxation**

## INTERGOVERNMENTAL FISCAL TRANSFERS

**10. Gupta, Manish**

***Emerging issues in state finances post-fourteenth finance commission: Analysis of state budgets 2016-17 / by Manish Gupta, Lekha Chakraborty, Pinaki Chakraborty.. - New Delhi: NIPFP, 2017. vii,55; ISBN : 978-81-88035-19-9. 336.0130954 G95E Q7;1 49906- 49907***

**Book Description:**This report is an outcome of the larger research project, “A Study of Intergovernmental Fiscal Transfers in India”, supported by a grant from the International Development Research Centre (IDRC), Canada, under the Think Tank Initiative.

In recent years, there has been a fundamental change in the Union-State fi-scal relations brought about by a number

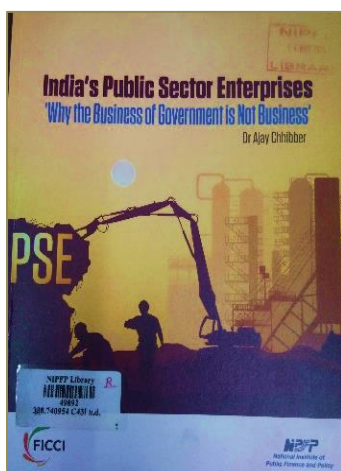

of policy developments which have both immediate and long-term implications for the States and their -finances. The report using state budgets of 2016-17 examines the likely impact of some of these policy changes on the -finances of state governments. Given the fact that in large federal countries including India, the responsibility for social sector spending lies with the subnational governments, any change in the -fiscal space of states will have implications for social sector financing. The report also examines the implications of these policy changes on expenditures of states, especially expenditures on social sector.

**PUBLIC SECTOR ENTERPRISES**

**11. Chhibber, Ajay**

**India's public sector enterprises: Why the business of government is not business / by Ajay Chhibber.. - New Delhi: FICCI/NIPFP. 48p.; 338.740954 C43I n.d.;1 49892- 49893**

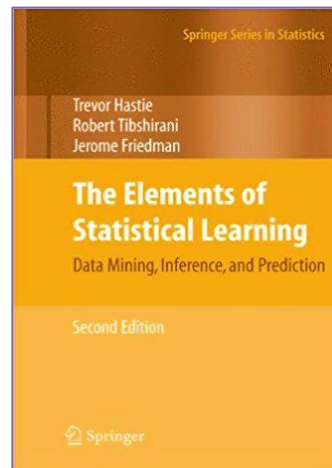

**Book Description:** This Important and stimulating FICCI-NIPFP study examines the new and strategic role that public enterprises can play in India's national development This monograph not only offers a new version for India's public sector but also a strategy for how to achieve it. This is indeed a pioneering contribution. A rapid implementation of the proposals outlined here will take India on the 'Growth Turnpike' and help achieve sustained and rapid advancement towards the country's social progress and the much needed strategic strengthening of our national economy

**\*\* 1. Public sector enterprises**

**STATISTICAL MATHEMATICS**

**12 Elements of statistical learning: Data mining, inference and prediction / by Trevor Hastie, Robert Tibshirani, Jerome Friedman.. - 2. - USA: Springer, 2017. xxii,745; (Springer Series in Statistics). ISBN : 978-0-387-84857-0. 519.5 H27E Q7 49891**

**Book Description:** This book describes the important ideas in a variety of fields such as medicine, biology, finance, and marketing in a common conceptual framework. While the

approach is statistical, the emphasis is on concepts rather than mathematics. Many examples are given, with a liberal use of colour graphics. It is a valuable resource for statisticians and anyone interested in data mining in science or industry. The book's coverage is broad, from supervised learning (prediction) to unsupervised learning. The many topics include neural networks, support vector machines, classification trees and boosting---the first comprehensive treatment of this topic in any book.

This major new edition features many topics not covered in the original, including graphical models, random forests, ensemble methods, least angle regression & path algorithms for the lasso, non-negative matrix factorisation, and spectral clustering. There is also a chapter on methods for "wide" data ( $p$  bigger than  $n$ ), including multiple testing and false discovery rates.

***\*\*1. Statistical mathematics 2. Data mining 3. Statistical inference 4. Regression models.***
