CAPITALISM

1. Rindermann, Heiner .

Cognitive capitalism: Human capital and the wellbeing of nations / by Heiner Rindermann..
- Cambridge: CUP, 2018. xvi,575;
ISBN : 978-1-107-65108-1.
335.401 R47C Q8 50638

Book Description: Nations can vary greatly in their wealth, democratic rights and the wellbeing of their citizens. These gaps are often obvious, and by studying the flow of immigration one can easily predict people's wants and needs. But why are there also large differences in the level of education indicating disparities in cognitive ability? How are they related to a country's economic, political and cultural development? Researchers in the paradigms of economics, psychology, sociology, evolution and cultural studies have tried to find answers for these hotly debated issues. In this book, Heiner Rindermann establishes a new model: the emergence of a burgher-civic world, supported by long-term background factors, furthered education and thinking. The burgher-civic world initiated a reciprocal development changing society and culture, resulting in past and present cognitive

capital and wealth differences. This is an important text for graduate students and researchers in a wide range of fields, including economics, psychology, sociology and political science, and those working on economic growth, human capital formation and cognitive development.

ECONOMIC DEVELOPMENT

6. Gewirtz, Julian .

Unlikely partners: Chinese reformers, western economists, and the making of global China / by Julian Gewirtz.. - Cambridge: Harvard University Press, 2017. vii,389; ISBN : 978-0-674-97113-4. 38.951 G33U Q7 50755

Book Description: Unlikely Partners recounts the story of how Chinese politicians and intellectuals looked beyond their country's borders for economic guidance at a key crossroads in the nation's tumultuous twentieth century. **Julian Gewirtz** offers a dramatic tale of competition for influence between reformers and hardline conservatives during the Deng Xiaoping era, bringing to light China's productive exchanges with the West.

When Mao Zedong died in 1976, his successors seized the opportunity to reassess the wisdom of China's rigid commitment to Marxist doctrine. With Deng Xiaoping's blessing, China's economic gurus scoured the globe for fresh ideas that would put China on the path to domestic prosperity and ultimately global economic power. Leading foreign economists

accepted invitations to visit China to share their expertise, while Chinese delegations travelled to the United States, Hungary, Great Britain, West Germany, Brazil, and other countries to examine new ideas. Chinese economists partnered with an array of brilliant thinkers, including Nobel Prize winners, World Bank officials, battle-scarred veterans of Eastern Europe's economic struggles, and blunt-speaking free-market fundamentalists.

Nevertheless, the push from China's senior leadership to implement economic reforms did not go unchallenged, nor has the Chinese government been eager to publicize its engagement with Western-style innovations. Even today, Chinese Communists decry dangerous Western influences and officially maintain that China's economic reinvention was the Party's achievement alone. Unlikely Partners sets forth the truer story, which has continuing relevance for China's complex and far-reaching relationship with the West.

7. Prabhu, K. Seeta .

Human development in an unequal world / by K. Seeta Prabhu and Sandhya S. Iyer.. - New Delhi: OUP, 2019. xxiii,370; ISBN : 978-0-19-949024-0. 330.954 P88H Q9 50746

Book Description: This book is about the human development paradigm that is assuming renewed importance at a time when global dialogue is preoccupied with discussing pathways for achieving the 2030 agenda of the Sustainable Development Goals. It deals with the concepts of human development in an unequal world and examines a range of issues of contemporary relevance such as social sectors, poverty, gender inequality, social exclusion, and sustainability. It argues for a paradigmatic shift in analysis, policy, and methodology towards a people-centered approach rooted in human flourishing and freedoms. The expansive lexicon of the human development approach is discussed in a succinct and integrated manner. The ten chapters of the book weave together the numerous concepts, methods, and evidence. The comprehensive coverage and the integrated framework presented will enable readers across the globe to arrive at a thorough understanding of the human development approach and apply these frameworks in development practice with a fresh and more relevant perspective.

8. Rural housing and economic development / edited by Don E. Albrecht and...[et al.].. - London: Routledge, 2018. . viii,274; (Routledge advances in regional economics, science and policy). ISBN : 978-1-138-04019-9. 338.973 AIIR Q8 50767

Book Description: Housing is crucial to the quality of life and wellbeing for individuals and families, but the availability of adequate or affordable housing also plays a vital role in community economic development. Rural areas face a substantial disadvantage compared to urban areas in regard to housing, and this book explores these issues.

Rural Housing and Economic Development includes chapters from nationally known experts from throughout the U.S. to provide insight to help understand and address the difficult housing concerns within rural areas. The chapters cover a variety of issues including housing for rural minorities, the extent of and problems associated with mobile home dwelling, the extent to which affordable rental housing is available in rural areas, the rapidly growing elderly population, and the housing consequences of rapid population and economic growth associated with energy development. The authors not only describe various housing problems, but also suggest policy approaches to more effectively address them.

This book will be a vital resource to policy makers at the local, state or national level as they grapple with difficult rural housing problems. Researchers and professionals dealing with housing issues will also benefit from the insights of these experts while the book will also be appropriate for upper level undergraduates or graduate students in courses on housing or economic development.

9. Sumner, Andy .

Development and distribution: Structural change in South East Asia / by Andy Sumner.. - Oxford: OUP, 2018. x,218; ISBN : 978-0-19-879236-9. 330.95 Su6D Q8 50757

Book Description: Since the Second World War, surprisingly few developing countries have experienced a truly sustained episode of economic and social convergence towards the structural characteristics of the advanced nations. The region of the world that has gone the furthest in that convergence is East Asia. Much has been written on comparative industrialization and development in North East Asia but relatively less on South East Asia. This book focuses on the latter and, more specifically on Malaysia, Indonesia, and Thailand. These three nations have all undergone a major transformation—in a way never anticipated—from being poor, agrarian countries to middle-income countries that have developed an industrial and manufacturing base. The ‘puzzle’ that flows from that achievement is as follows: how did MIT achieve such a transformation, and how did they achieve the transformation with a form of economic growth that was driven by structural transformation, but that was also ‘inclusive’? Given that historically it has been thought that structural transformation tends to push up inequality, whilst inclusive growth necessitates static or even falling inequality, this last point is particularly salient to developing countries. Understanding how the transformation was possible in a relatively short space of time, the extent to which it was inclusive, and the caveats and prospects for South East Asia is thus an area of enquiry significant to all developing countries as they seek economic and social transformation.

ECONOMIC POLICY

10. Economic foundations for creative ageing policy / edited by Andrzej Klimczuk.. – London: Palgrave Macmillan, 2017. . xxxvii,373; V.2: Putting theory into practice. ISBN : 978-1-137-53522-1. 338.9 K68E Q7.2 50758

Book Description: Aging populations are a major consideration for socio-economic development in the early 21st century. This demographic change is mainly seen as a threat rather than as an opportunity to improve the quality of human life. Aging population is taking place in every continent of the world with Europe in the least favourable situation due to its aging population and reduction in economic competitiveness. Economic Foundations for Creative Aging Policy offers public policy ideas to construct positive answers for ageing populations. This exciting new volume searches for economic solutions that can enable effective social policy concerning the elderly. Klimczuk covers theoretical analysis and case study descriptions of good practices, to suggest strategies that could be internationally popularised.

ECONOMICS

11. *Economics of the great war: A centennial perspective / edited by Stephen Broadberry and Mark Harrison.. - London: CEPR, 2018, vii,181;*

ISBN : 978-1-912179-17-6.

940.31 B78E Q8 50781

Book Description: November 2018 marks the 100th anniversary of the end of World War I, a watershed event in modern history. The causes and consequences of the war have been variously attributed to economic, political, and social factors over time – from growing antiimperialist sentiment to the search for profitable investment opportunities overseas.

This eBook presents twenty essays that collectively review of the role of economics in the origins, evolution, and impact of the Great War. The authors look at both short- and long-term factors – including behavioural economic explanations for military decisions and the role of arms manufacturers and private sector participants.

The process of war itself has, as yet, had relatively little analysis from an economic history perspective. While military historians focus on personal factors such as leadership and strategy, this volume shows that the roles of resources and labour supply in an all-encompassing ‘total war’ were perhaps greater. The authors pay greatest attention to the impact of the war, which has been – quite literally – revolutionary. Demographic changes and new limits on migration had major consequences for domestic labour markets and inequality.

12. *Monahan, Kelly .*

How behavioral economics influences management decision-making: A New Paradigm / by Kelly Monahan.. - United States: Academic Press, 2018. xv,261; (Perspectives in behavioral economics and the economics of behavior).

ISBN : 978-0-12-813531-0.

330.019 M74H Q8 50761

Book Description: How Behavioral Economics Influences Management Decision-Making: A New Paradigm critically reexamines the management function in 21st century workplaces. The book seeks to examine and explain the real-world behaviors of employees and acknowledge the human nature that binds us all together and how to appeal to these characteristics in order to help organizations prosper. It explores well-observed but rarely understood features of employee cognition and irrationality, challenging the dominant discourse and offering an alternative to gain greater competitive advantage in today's complex markets. It also provides an effective new framework on the best ways to develop relevant management skills as they pertain to hiring, performance management, change management, employee engagement, and goal setting. As the knowledge economy continues

to grow, the social bonds within companies will prove to be a key differentiation to deliver on the next big idea.

Developing productive decisions with staff in the talent-driven global economy increasingly requires the development of "intrinsic" meaning in work, a human-centered work-place culture, and human-focused working practices. This book tackles these topics in comprehensive and efficient detail.

13. Murphy, Antoin E. .

John law: Economic theorist and policy maker / by Antoin E. Murphy.. - Oxford: OUP, 2018. xiii,391; ISBN : 978-0-19-882348-3. 332.092 M95J Q8 50765

Book Description: John Law (1671-1729) left a remarkable legacy of economic concepts from a time when economic conceptualization was very much at an embryonic stage. Yet he is best known—and generally dismissed—today as a rake, duellist, and gambler. This intellectual biography offers a new approach to Law, one that shows him to have been a significant economic theorist with a vision that he attempted to implement as policy in early-eighteenth-century Europe.

Law's style, marked by a clarity and use of modern terminology, stands out starkly against

the turgid prose of many of his contemporaries. His vision of a monetary and financial system was certainly one of a later age, for Law believed in an economy of banknotes and credit where specie had no role to play. Ultimately Law failed as a policy-maker, in part because of the entrenchment of the financiers and their aristocratic backers and in part because of theoretical flaws in his vision. His struggle for power took place against the background of Europe's first major stock boom and collapse. The collapse of the Mississippi System, which he had conceived, and the South Sea Bubble led to a lasting impression of Law as a failure. It is this impression that Antoin Murphy seeks to dispel.

14. Payson, Steven .

How economics professors can stop failing us: The discipline at a crossroads / by Steven Payson.. - London: Lexington Books, 2018. xiii,358; ISBN : 978-0-7391-9835-3. 330.0711 P29H Q7 50763

Book Description: This book provides an eye-opening exposé on economics professors that will surely shock anyone who is not familiar with the topic, and even some of those who *are* familiar with it. It is critical of the behavior of economics professors, but is *not* critical of the field of economics itself. In

fact, the book argues that it is essential for economics professors to improve in the work they perform, precisely because of the vital importance of their field.

Other books that criticize economics professors typically present complex arguments that interest only the most advanced scholars. However, this book is completely different. It is written to be understandable to *anyone* who has with an interest in economics, regardless of their background. At the same time, the book does include the most relevant scholarly arguments—it just presents them in a manner that allows anyone to understand them.

Also unlike other books on economics, *How Economics Professors Can Stop Failing Us* is written in the context of a genuine exposé. As such, it ventures “backstage” behind the “show business” that has dominated the profession, revealing the profession’s deep, dark, (and at times rather ugly) secrets. The book is able to do this by having an author who has experienced first-hand, studied, and written on this topic area for over three decades, who has organized training seminars on it, and who has served for over a decade as the Executive Director of the Association for Integrity and Responsible Leadership in Economics.

15. Petchko, Katerina .

How to write about economics and public policy / by Katerina Petchko.. - United States: Academic Press, 2018. xix,452; ISBN : 9780128130100. 330 P44H Q8

Book Description: *How to Write about Economics and Public Policy* is designed to guide graduate students through conducting, and writing about, research on a wide range of topics in public policy and economics. This guidance is based upon the actual writing practices of professional researchers in these fields and it will appeal to practitioners and students in disciplinary areas such as international economics, macroeconomics, development economics, public finance, policy studies, policy analysis, and public administration. Supported by real examples from professional and student writers, the book helps students understand what is expected of writers in their field and guides them through choosing a topic for research to writing each section of the paper. This book would be equally effective as a classroom text or a self-study resource.

FINANCE

19. Graeber, David .

Debt: The first 5000 years / by David Graeber.. - 2. New York: Melville House Publishing, 2014. 542;

Updated and expanded edition.

ISBN : 978-1-61219-419-6.

332 G75D Q4 50637

Book Description: Here anthropologist David Graeber presents a stunning reversal of conventional wisdom: he shows that before there was money, there was debt. For more than 5,000 years, since the beginnings of the first agrarian empires, humans have used elaborate credit systems to buy and sell goods—that is, long before the invention of coins or cash. It is in this era, Graeber argues, that we also first encounter a society divided into debtors and creditors.

Graeber shows that arguments about debt and debt forgiveness have been at the center of political debates from Italy to China, as well as sparking innumerable insurrections. He also brilliantly demonstrates that the language of the ancient works of law and religion (words like “guilt,” “sin,” and “redemption”) derive in large part from ancient debates about debt, and shape even our most basic ideas of right and wrong. We are still fighting these battles today without knowing it.

20. Impact of blockchain technology on finance: A catalyst for change / by Michael Casey and...[et al.]. - London: CEPR, 2018, xxi,81;

(Geneva reports on the world economy 21).

ISBN : 978-1-912179-15-2.

332.178 C26I Q8 50782

Book Description: Blockchain technology has the potential to change many aspects of the financial services sector and the broader economy. The 21st Geneva Report on the World Economy first provides a summary review of the basics of blockchain technology and its challenges, costs, and benefits. It then gives an overview of blockchain technology and the potential direct impact on the financial sector, including a discussion of tokens, initial coin offerings (ICOs), and crypto-exchanges—all salient regulatory and market issues today. Building on this, it assesses possible use cases beyond the world of finance.

FISCAL POLICY

21. Peiyong, Gao .

China's fiscal policy: Theoretical and situation analysis / by Gao Peiyong.. - London: Routledge, 2018. xiii,172; (China perspectives).

ISBN : 978-1-138-89958-2.
339.520951 P35C Q8 50756

Book Description: Fiscal policy has always been a primary measure of macroeconomic control. The fiscal revenue and expenditure can influence the operation of the whole economic and social activities by changing the existing GDP distribution pattern, affecting the consumption and investment of enterprises and people, etc.

Within the framework of macroeconomic analysis, this book reviews the evolution of China's fiscal policy, and the main changes China's economy has experienced since 1990s. To begin with, it makes an empirical research of China's national debts, including their relationship with macroeconomic regulation and total social demand. Besides, it examines the economic effect mechanism of national debts issuance. Then it focuses on the taxation issues, elucidating the sources of tax revenue growth and the judgments on tax burden. The issue of tax reduction is also covered, especially its complexity in China. Lastly, it provides insights into China's fiscal tendency, changes of macroeconomic policies, and financial operation in the context of the "New Normal".

HEALTH CARE

23. Devakumar, Delan .

Oxford textbook of global health of women, newborns, children, and adolescents / edited by Delan Devakumar and...[et al.]. - New Delhi: OUP, 2019. xxii,244; (Oxford textbooks in public health). ISBN : 978-0-19-879468-4. 362.1 D490 Q9 50748

Book Description: Each year there are 10 million deaths among newborns (including stillbirths), children, and adolescents, as well as from maternal causes. These deaths are mostly preventable with existing interventions - a major injustice in today's world. The vast majority happen in sub-Saharan Africa and South Asia, yet the dangers facing women and children are relevant everywhere. While middle- and high-income countries have lower mortality rates overall, there are still major inequalities in outcomes within these countries. To improve health outcomes for women and children around the world, more data on the burden of disease and evidence of intervention effectiveness are crucial.

The Oxford Textbook of Global Health of Women, Newborns, Children, and Adolescents is the first comprehensive book on this topic. Written by experts in the field, this invaluable source takes a lifecourse approach to health. Following women from adolescence to motherhood, it covers sexual and reproductive health, HIV, pregnancy, mental health, and much more. Child development is traced from conception through to pregnancy, the newborn period, and into childhood and adolescence, with topics including newborn care, nutrition, infections, and injuries. This comprehensive resource asks uncomfortable but necessary questions about the determinants of health, such as maltreatment, injury, and malnutrition, and looks at how to influence policy and inspire change.

24. Trein, Philipp .

Healthy or sick?: Coevolution of health care and publichealth in a comparative perspective / by Philipp Trein.. - Cambridge: CUP, 2018. xiv,318; (Cambridge studies in comparative public policy). ISBN : 978-1-108-42649-7. 362.1 T72H Q8 50760

Book Description: The book analyses how policies to prevent diseases are related to policies aiming to cure illnesses. It does this by conducting a comparative historical analysis of Australia, Germany, Switzerland, the UK, and the US. It also demonstrates how the politicization of the medical profession contributes to the success of preventative health policy. The book argues that two factors lead to a close relationship of curative and preventative elements in health policies and institutions: a strong national government that possesses a wide range of control over subnational levels of government, and whether professional organizations (especially the medical profession) perceive preventative and non-medical health policy as important and campaign for it politically. The book provides a historical and comparative narrative to substantiate this claim empirically.

25. Wendel, Jeanne .

Understanding healthcare economics: Managing your career in an evolving healthcare system / by Jeanne Wendel, Teresa D. Serratt, William O'Donahue.. - 2. - London: CRC Press, 2018. xl,246; ISBN : 978-1-138-72301-6. 338.473621 W48U Q8 50754

Book Description: Healthcare economics is a topic of increasing importance due to the substantial changes that are expected to radically alter the way Americans obtain and finance healthcare. Understanding Healthcare Economics, 2nd Edition provides an evidence-based framework to help practitioners comprehend the changes already underway in our nation's healthcare system. It presents important economic facts and explains the economic concepts needed to understand the implications of these facts. It also summarizes the results of recent empirical studies on access, cost, and quality problems in today's healthcare system.

The material is presented in two sections. Section 1 focuses on the healthcare access, cost and quality issues that create pressures for change in health policy. The first edition was completed just as the Patient Protection and Affordable Care Act (PPACA) was debated and passed. This new edition updates the information about access, cost, and quality issues. It also discusses the pressure for change that led to the passage of the PPACA, evidence that shaped the construction of the act, evidence

on the impacts of the PPACA, and evidence on the pressures for future changes.

Section 2 focuses on changes that are underway including: changes in the Medicare payment system; new types of healthcare delivery organizations such as ACOs and patient-centered medical homes. It also discusses the current efforts to help patients build health such as wellness programs and disease management programs. And finally, health information technology will be discussed.

The new edition will maintain the current structure; however each chapter will be updated to discuss post-PPACA evidence on each type of type. In addition to the updates previously mentioned, the authors will present a series of data explorations to several chapters. Most of the new data explorations present summarized statistical information based on de-identified data from one hospital electronic data system. These data explorations serve two purposes. First, they illustrate the impacts of the pressures for change – and some of the changes – on healthcare providers. For example, the data illustrates the financial impact of pre-PPACA uncompensated care. Second, explanation of the data will require explanations of standard coding systems that are used nationwide (DRGs, CPT, ICD) codes. Other data explorations provide detail about other sources of data useful for health policy analysis, and for healthcare providers and insurers.

INDUSTRIAL POLICY

26. *Viscusi, W. Kip .*

*Economics of regulation and anti trust. / by W. Kip Viscusi, Joseph E. Harrington, David E. M. Sappington.. - 5. - Cambridge: MIT Press, 2018. xxix,966;
ISBN : 978-0-262-03806-5.
338.9 V82E Q8 50759*

Book Description: A thoroughly revised and updated edition of the leading textbook on government and business policy, presenting the key principles underlying sound regulatory and antitrust policy.

Regulation and antitrust are key elements of government policy. This new edition of the leading textbook on government and business policy explains how the latest theoretical and empirical economic tools can be employed to analyze pressing regulatory and antitrust issues. The book departs from the common emphasis on institutions, focusing instead on the relevant underlying economic issues, using state-of-the-art analysis to assess the appropriate design of regulatory and antitrust policy. Extensive case studies illustrate fundamental principles and provide insight on key issues in regulation and antitrust policy.

This fifth edition has been thoroughly revised and updated, reflecting both the latest developments in economic analysis and recent economic events. The text examines regulatory practices through the end of the Obama and beginning of the Trump administrations. New material includes coverage of global competition and the activities of the European Commission; recent mergers, including Comcast-NBC Universal; antitrust in the new economy, including investigations into Microsoft and Google; the financial crisis of 2007–2008 and the Dodd-Frank Act; the FDA

approval process; climate change policies; and behavioral economics as a tool for designing regulatory strategies.

INTERNATIONAL ECONOMIC RELATIONS

28. *Vonnegut, Andrew .*

Inside the global economy: A practical guide / by Andrew Vonnegut.. - London: Rowman & Littlefield, 2018. ix,321;

ISBN : 978-1-4422-8160-8.

337 V89I Q8 50764

Book Description: This comprehensive and informed text offers a practical introduction to the workings of the global economy. Drawing on his hands-on experience in international finance and economic policy, Andrew Vonnegut clearly explains economic concepts and illustrates them with cogent case studies. He describes the global economy by combining principles of economics with investment finance, decision theory, economic history, behavioral psychology, and accounting. Within a rigorous framework that sheds light on the reasons behind international economic events and trends, he brings the people, institutions, incentives, and money flows of the global economy to life.

Oriented toward professionals and students, working or intending to work in the global economy, this book fills an important void. It will be invaluable for practitioners in business, investment finance, public policy, consulting, global studies, and journalism. Providing the tools needed to understand international economics, Vonnegut enlightens readers on the

people, behaviors, and institutions behind trade and investment flows in today's globalized economies, and how they all contribute to the volatile and dynamic world we are experiencing.

INTERNATIONAL MONETARY FUND

29. *Gregorio, Jose De .*

IMF reform: The unfinished agenda / by Jose De Gregorio and...[et al.]. - London: CEPR, 2018. xxiii,99; (Geneva reports on the world economy 20). ISBN : 978-1-912179-16-9. 332.152 G86I Q8 50780

Book Description: In this sequel to the first Geneva Report on the World Economy, published twenty years ago, the same group of authors review changes in the global economy and the IMF over this two-decade interval. While they find that that the IMF has responded actively to the ongoing globalisation trend, they flag concerns about formidable new challenges. For example, there is a danger that the IMF's resources could be significantly reduced at the very time that effective crisis management requires additional funding. The growth of emerging market economies increasingly calls into question the current distribution of voting power within the institution. Regional

monetary arrangements and bilateral currency swaps create an alternative to the multilateral order epitomised by the IMF, as evidenced by the Fund's diminished role in the euro area crisis and by the rise of China with its own network of economic and financial initiatives. To address these challenges, this report suggests a quick-disbursing emergency financing facility for countries with strong fundamentals that does not require prequalification; puts forward new ideas for the IMF's dealings with regional arrangements; and recommends major changes to IMF governance, including a high-level non-resident Board, elected using a tailored voting procedure, whose role is to make the independent management team more accountable.

LAW

30. *Basu, Kaushik .*

Republic of beliefs: A new approach to law and economics / by Kaushik Basu.. - Princeton: Princeton University Press, 2018. xvii,238; ISBN : 978-0-691-19056-3. 340.11 B29R Q8 50752

Book Description: In *The Republic of Beliefs*, Kaushik Basu, one of the world's leading economists, argues that the traditional economic analysis of the law has significant

flaws and has failed to answer certain critical questions satisfactorily. Why are good laws drafted but never implemented? When laws are unenforced, is it a failure of the law or the enforcers? And, most important, considering that laws are simply words on paper, why are they effective? Basu offers a provocative alternative to how the relationship between economics and real-world law enforcement should be understood.

Basu summarizes standard, neoclassical law and economics before looking at the weaknesses underlying the discipline. Bringing modern game theory to bear, he develops a "focal point" approach, modeling not just the self-interested actions of the citizens who must follow laws but also the functionaries of the state—the politicians, judges, and bureaucrats—enforcing them. He demonstrates the connections between social norms and the law and shows how well-conceived ideas can change and benefit human behavior. For example, bribe givers and takers will collude when they are treated equally under the law. And in food support programs, vouchers should be given directly to the poor to prevent shop owners from selling subsidized rations on the open market. Basu provides a new paradigm for the ways that law and economics interact—a framework applicable to both less-developed countries and the developed world.

Highlighting the limits and capacities of law and economics, *The Republic of Beliefs* proposes a fresh way of thinking that will enable more effective laws and a fairer society.

Trump administration and international law / by Harold Hongju Koh.. - New Delhi: OUP, 2019. viii,221; ISBN : 978-0-19-091218-5. 341.0973 K82T Q9 50749

Book Description: Will Donald trump international law? Since Trump's Administration took office, this question has haunted almost every issue area of international law. One of our leading international lawyers—a former Legal Adviser of the US State Department, Assistant Secretary of State for Human Rights, and Yale Law Dean—argues that President Trump has thus far enjoyed less success than many believe, because he does not own the pervasive "transnational legal process" that governs these issue areas. This book shows how those opposing Trump's policies during his administration's first two years have successfully triggered that process as part of a collective counter-strategy akin to Muhammad Ali's "rope-a-dope." The book surveys immigration and refugee law, human rights, climate change, denuclearization, trade diplomacy, relations with North Korea, Russia and Ukraine, America's "Forever War" against Al Qaeda and the Islamic State, and the ongoing tragedy in Syria. Koh's tour d'horizon illustrates the many techniques that players in the transnational legal process have used to blunt Trump's early initiatives. The high stakes of this struggle, and its broader implications for the future of global governance—now challenged by the rise of populist authoritarians—make this exhausting counter-strategy both worthwhile and necessary.

LIFE SCIENCES

35. Fairhurst, Michael .

Biometrics: A very short introduction / by Michael Fairhurst.. - New Delhi: OUP, 2018. xvii,124;

ISBN : 978-0-19-880910-4.

570.15195 F15B Q8 50744

Book Description: We live in a society which is increasingly interconnected, in which communication between individuals is mostly mediated via some electronic platform, and transactions are often carried out remotely. In such a world, traditional notions of trust and confidence in the identity of those with whom we are interacting, taken for granted in the past, can be much less reliable. Biometrics - the scientific discipline of identifying individuals by means of the measurement of unique personal attributes - provides a reliable means of establishing or confirming an individual's identity. These attributes include facial appearance, fingerprints, iris patterning, the voice, the way we write, or even the way we walk. The new technologies of biometrics have a wide range of practical applications, from securing mobile phones and laptops to

establishing identity in bank transactions, travel documents, and national identity cards.

This Very Short Introduction considers the capabilities of biometrics-based identity checking, from first principles to the practicalities of using different types of identification data. Michael Fairhurst looks at the basic techniques in use today, ongoing developments in system design, and emerging technologies, all aimed at improving precision in identification, and providing solutions to an increasingly wide range of practical problems. Considering how they may continue to develop in the future, Fairhurst explores the benefits and limitations of these pervasive and powerful technologies, and how they can effectively support our increasingly interconnected society.

MANAGEMENT

36. *Muller, Jerry Z. .*

Tyranny of metrics / by Jerry Z. Muller.. - Princeton:Princeton University Press, 2018. ix,220;

ISBN : 978-0-691-17495-2. 658.4013 M91T Q8 50769

Book Description: Today, organizations of all kinds are ruled by the belief that the path to success is quantifying human performance, publicizing the results, and dividing up the rewards based on the numbers. But in our zeal to instill the evaluation process with scientific rigor, we've gone from measuring performance to fixating on measuring itself. The result is a tyranny of metrics that threatens the quality of our lives and most important institutions. In this timely and powerful book, Jerry Muller uncovers the damage our obsession with metrics is causing—and shows how we can begin to fix the problem.

Filled with examples from education, medicine, business and finance, government, the police and military, and philanthropy and foreign aid, this brief and accessible book explains why the seemingly irresistible pressure to quantify performance distorts and distracts, whether by encouraging "gaming the stats" or "teaching to the test." That's because what can and does get measured is not always worth measuring, may not be what we really want to know, and may draw effort away from the things we care about. Along the way, we learn why paying for measured performance doesn't work, why surgical scorecards may increase deaths, and much more. But metrics can be good when used as a complement to—rather than a replacement for—judgment based on personal experience, and Muller also gives examples of when metrics have been beneficial.

POLITICS AND GOVERNMENT

37. *Business and politics in India / edited by Christophe Jaffrelot, Atul Kohli, Kanta Murali.. - New Delhi: OUP, x,322; (Modern south asia).*

ISBN : 978-0-19-005330-7. 322.30954 J18B Q9 50745

Book Description: Over the last few decades, politics in India has moved steadily in a pro-business direction. This shift has important implications for both government and citizens. In *Business and Politics in India*, leading scholars of Indian politics have gathered to offer an analytical synthesis of this vast topic. Collectively, they cover the many strategies that businesses have used to exert their newfound power in recent times and organize the book around a few central concerns. They first analyze the nature of business power and how it shapes political change in India. Second, they look at the consequences of business' growing power on some important issue areas—labor, land, urban governance, and the media. Finally, they take account of regional variation and analyze state-business relations. This definitive account offers significant insights into how and why corporations have increased their power in contemporary Indian politics.

PUBLIC FINANCE

38. *Atkinson, Anthony B. .*

Lectures on public economics / by Anthony B. Atkinson and Joseph E. Stiglitz.. - New Jersey: Princeton University press, 2015. xxx,532; With a new introduction by the authors. ISBN : 978-0-691-16641-4. 336 At5L Q5 50603

Book Description: This classic introduction to public finance remains the best advanced-level textbook on the subject ever written. First published in 1980, *Lectures on Public Economics* still tops reading lists at many leading universities despite the fact that the book has been out of print for years. This new edition makes it readily available again to a new generation of students and practitioners in public economics.

The lectures presented here examine the behavioral responses of households and firms to tax changes. Topics include the effects of taxation on labor supply, savings, risk-taking, the firm, debt, and economic growth. The book then delves into normative questions such as the design of tax systems, optimal taxation, public sector pricing, and public goods, including local public goods.

Written by two of the world's preeminent economists, this edition of *Lectures on Public Economics* features a new introduction by Anthony Atkinson and Joseph Stiglitz that discusses the latest developments in the field and areas for future research.

- The definitive advanced-level textbook on public economics
- Examines the effects of taxation on households and firms
- Covers tax system design, optimal taxation, public sector pricing, and more

- Includes suggestions for further reading

40. Oliver, Adam .

Origins of behavioural public policy / by Adam Oliver.. - Cambridge: CUP, 2017. xviii,195; ISBN : 978-1-316-64966-4. 320.6 O14O Q7 50639

Book Description: The use of behavioural science to inform policy is one of the main developments in the social sciences over the last several decades. In this book, Adam Oliver offers an accessible introduction to the development of behavioural public policy, examining how behavioural economics might be used to inform the design of a broad spectrum of policy frameworks, from nudges, to bans on certain individual behaviours, to the regulation of the commercial sector. He also considers how behavioural economics can explain and predict phenomena as a challenge to economists' assumptions around how people perceive time, utility and money. The book offers an intellectual foundation for all those concerned with behavioural public policy, from academics, undergraduate and postgraduate students with a diverse range of disciplinary perspectives, such as economics, political science, sociology and anthropology, to policy makers and practitioners working directly with behavioural public policy in their everyday working lives.

SOCIAL GROUPS

41. *Insights in the economics of aging / edited by David A. Wise.. - Chicago: University of Chicago Press, 2017. . ix,388;*
(National bureau of economic research conference report).
ISBN : 978-0226-42667-9.
305.26 W75I Q7 50750

Book Description: The fraction of the population over age sixty-five in many developed countries is projected to rise, in some cases sharply, in coming decades. This has drawn growing interest to research on the health and economic circumstances of individuals as they age. Many individuals are retiring from paid work, yet they are living longer than ever. Their well-being is shaped by their past decisions such as their saving behavior, as well as by current and future economic conditions, health status, medical innovations, and a rapidly evolving landscape of policy incentives and supports.

The contributions to *Insights in the Economics of Aging* uncover how financial, physical, and emotional well-being are integrally related. The authors consider the interactions between financial circumstances in later life, such as household savings and home ownership, physical circumstances such as health and disability, and emotional well-being, including happiness and mental health.

43. Scheve, Kenneth .

Taxing the rich: A history of fiscal fairness in the United States and Europe / by Kenneth Scheve and David Stasavage.. - Princeton: Princeton University Press, 2016. xv,266;
ISBN : 978-0-691-16545-5.
336.2 Sc2T Q6 50753

Book Description: In today's social climate of acknowledged and growing inequality, why are there not greater efforts to tax the rich? In this wide-ranging and provocative book, Kenneth Scheve and David Stasavage ask when and why countries tax their wealthiest citizens—and their answers may surprise you.

Taxing the Rich draws on unparalleled evidence from twenty countries over the last two centuries to provide the broadest and most in-depth history of progressive taxation available. Scheve and Stasavage explore the intellectual and political debates surrounding the taxation of the wealthy while also providing the most detailed examination to date of when taxes have been levied against the rich and when they haven't. Fairness in debates about taxing the rich has depended on different views of what it means to treat people as equals and whether taxing the rich advances or undermines this norm. Scheve and Stasavage argue that governments don't tax the rich just because inequality is high or rising—they do it when people believe that such taxes compensate for the state unfairly privileging the wealthy. Progressive taxation saw its heyday in the twentieth century, when compensatory arguments for taxing the rich focused on unequal sacrifice in mass warfare. Today, as technology gives rise to wars of more limited mobilization, such arguments are no longer persuasive.

Taxing the Rich shows how the future of tax reform will depend on whether political and

economic conditions allow for new compensatory arguments to be made.

44. Taxation of pensions / edited by Robert Holzman and John Piggott.. - Cambridge: MIT Press, 2018. . x,508;

(CESifo seminar series).

ISBN : 978-0-262-03832-4.

336.2428 H74T Q8 50768

Book Description: Theoretical and policy perspectives on the taxation of pension, viewed in an international context. Policy makers and academic researchers have been preoccupied in recent decades with the design of pension schemes and effective pension system reform. Relatively little attention has been given to the taxation of pensions and, more broadly, the provision of retirement income. In this book, experts from a range of countries explore the interconnection. Their contributions are especially timely, given recent demographic and political developments including population aging that lengthens the time between contribution payment and benefit receipt, the mobility of capital and labor brought about by globalization, and the complexity of pension taxation within and between countries. In shedding light on these issues, the chapters document the various forms of taxation of pension systems; use economic theory to explain both qualitative and

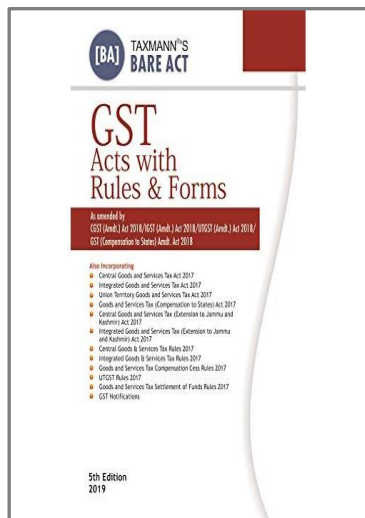

quantitative observations; and consider whether the observed interaction of taxation and pensions is efficient. Theoretical overviews are followed by rigorous analyses of pension taxation in specific countries, including Denmark, Sweden, Portugal, Australia, Germany, the United Kingdom, and the United States.
